Investing for the future of Palmerston North

Overview of electricity distribution investment

Oliver Vincent and Alex Spiers | 2 September 2020

What projects do we have underway

Network Projects

- Construction of a new substation at Ferguson Street (Complete)
- Installation of larger capacity cables between Pascal, Ferguson, Main and Keith Streets (Complete)
- Installation of a second transformer at Ferguson substation (In progress)
- New indoor 33kV switchroom at Linton substation (In progress)
- Two new underground circuits from Linton substation to Ferguson substation (In progress)

Projects PNCC & Powerco are indirectly involved in

- Provincial Growth Fund – Projects
- NZDF/MoD - Ohakea & Linton
- Food HQ- Fitzherbert Science Centre
- Kiwi Rail: Regional Growth Hub

Palmerston North City Vision

Questions

Thank You

Ensure safe, secure and resilient networks

So, we're investing in asset renewal, maintenance and vegetation management to improve our networks and their reliability

Support growth in our communities

We're building new and upgraded assets so we can supply the increasing demand for electricity coming from population growth and more commercial and industrial activity

Enable your energy choices

We're evolving our network to provide for new technologies like electric vehicles and solar generation, and respond to the challenges of the 3Ds digitalisation, decentralisation and decarbonisation
