If you have any comments to make about the proposed speed limit changes for the above roads in Pahiatua-Aokautere, please write them here:
I strongly support the proposed changes and consider they are way overdue. Having nearly been a couple of metres from being over by someone in Ridgeview Road, who could not see where they were driving but drove anyway, and nearly getting wiped out by drivers driving too fast in the first 500M of that road, I would like to see a reduction to 50Km/hour.

Do you support or oppose the proposed speed limit change for Bunnythorpe Road?
Support
If you have any comments to make about the proposed speed limit changes for the above roads in Ashhurst, please write them here:
the Bunnythorpe Rd coming into Mulgrave St needs to be have a longer area at 50km and also no engine brakes as we live at corner of Hilllcrest Road the trucks are really loud and noisy and go really fast down the road into Ashhurst. If it was 50km just after the intersection of Grove Road it would help cars going onto the Bunnythorpe Road and also slow the vehicles coming down Bunnythorpe,

4-2

Ashhurst road into Mulgrave St. This should really be done as they go so fast it can be dangerous .

If you have any comments to make about the proposed speed limit changes for the above roads in Ashhurst, please write them here:
The Bunnythorpe,Ashhurst Road should be 50kms from about the Grove Road intersection. As the trucks coming down into Ashhurst go to FAST and have engine brakes on it is Really loud and noisy and and they don't slow down until they get to the Mulgrave 50km sign This needs to be done sooner than later.

If you have any comments to make about the proposed speed limit changes for Tennent/Summerhill Drive, please write them here:
Very pleased to see the recognition of the increased traffic flow (both motorised vehicles and cyclists/pedestrians) in this area and the need to reduce speeds accordingly. FoodHQ is very supportive of this both from a safety perspective and also because of the benefits of making it less confronting for pedestrians and cyclists around the wider Tennent/Summerhill Dr area. We are very keen to ensure that the FoodHQ Science Park is welcoming and functional, and being able to easily move around without concern for safety is a key part of that. Happy to speak to Council about our support for this if need be, but no specific need to.

I am a New Zealander who lived abroad for 30+ years but returned to NZ 3 years ago. NZ is still a great country but I am shocked by the poor road safety standards - especially for cyclists and road crossing for the elderly/disabled people. I love cycling - but I've had many close calls and was finally hit by a car 2 years ago. When I went to highschool (1970s) thousands of kids biked to school but now very few. It's just too dangerous and the traffic goes too fast. We need

10-2

more curbed cycleways, traffic lights, overpasses and speed bumps. If made safer thousands of kiwis (and tourists) would choose bike over car! Happy to chat further. Glen Hepburn, Lecturer IPU (mob. 02102814513)

Please install traffic lights or an underpass from IPU to the Summerhill shops. I work at IPU - and since my accident (knocked off my bike) it's a struggle to cross the road to get to the shops. During IPU events I have witnessed many near accidents as disabled people and parents with young children rush to cross the road. This is a high-risk spot.

Is it possible to extend the 80km limit to past the Newbury Line/Waughs road intersection? There are many trucks using Campbell Road in the early hours of the morning and they use engine braking, all the way from the Newbury Line/Waughs Road intersection, across the railway line and through to Bunnythorpe. This creates unnecessary noise at this time of the day for neighbours.

From: Submission
Subject: FW: Speed Limit reviews - The Square

From: Graeme Fenemor

Sent: Saturday, 1 August 2020 5:38 AM
To: Palmerston North City Council Info <Info.Info@pncc.govt.nz>
Subject: Speed Limit reviews - The Square

Dear All,

Attention: Mr Peter Ridge

Thank you for the opportunity of submission on the current round of speed limit bylaw changes.

In line with reviewing speed limits, are there any plans to review the limits around The Square? I personally would like to see the whole area inside the ring streets of Grey/Walding, Bourke/Pitt, Ferguson, Princess set to 30 kmh, including The Square and all streets between. This would see a benefit of setting a limit that is in keeping of the actual speed I have observed travelled within these areas, and re-enforce the safety factors around both vehicle movements (including in and out of car parking) and other users within the street (cyclists and pedestrians), as well as encouraging thru traffic into using the ring streets to travel across Palmerston North rather than travelling thru this area.

I see this as having significant beneficial impact if changed sooner rather than later, and would be supportive of this change.

Kindest Regards
Graeme Fenemor

I would like to see the speed limit change along Roberts Line to extend down to the intersection to Kairanaga-Bunnythorpe Road. Roberts Line is very narrow and the continued use of this road by large trucks and large truck and trailer units travelling at the current open road limit is of real concern. So lowering the speed would make it safer for other users especially the large number of cyclists using this road.

Reducing the speeds on the built up side roads is sensible. However, the speed on the main track should not be reduced. If there are issues with the road fix these rather than slowing this important travel route.

If you have any comments to make about the proposed speed limit changes for Tennent/Summerhill Drive, please write them here:
Speeds at the intersection with Summerhill Drive and Tennent Drive have been an issue and it is good to see them reduced. Unfortunately this intersection is designed as a 'flyover' so all motorists expect to keep driving through it, and not slow down. It is unfriendly and unsafe to anyone who is not in a motor vehicle and will remain so with this design. In hindsight, given the amount of residential development up the hill, urban designers may have preferred a more pedestrian and cycle friendly intersection - lights.

For the genuine residential areas such as Polson Hill drive, I don't think 60kph is safe enough. Although the development is of small lifestyle blocks, pedestrians and cyclists and scooterists should still be catered to in the design of the roads.

The pohangina rd change is confused here? I read on your site it was going to transition from 100 to 80km. I propose it should be even lower @ 70km because of the amount of heavy traffic: tankers (milk&fuel), truck and trailer cattle and metal trucks, logging trucks and trucks carrying heavy machinery. This is a stretch of road that also encourages speeding cars which have a long straight

19-2

road to wind up their speedometers. All this makes it a treacherous/risky road for other road users (a lot of cycle training happens).

I support the reduction - however, given the volume of traffic I think there is an opportunity to either reduce the limit further to 50 and/or put speed bumps at or around the blind corner at 79 Kingsdale Park drive. Residents drive quickly around the corner and up the hill at this stage (as well as speeding down the hill). Motorists seem to maintain the open road speed through the subdivision, which for the residents of 79 and 88 are justifiably concerned about.

If you have any comments to make about the proposed speed limit changes for Tennent/Summerhill Drive, please write them here:
The speed limits on and off the Tennent/Summerhill bridge are confusing and cause a lot of the traffic to speed. Better signage and lowering of speed limits from the Massey side onto the bridge would be hugely helpful in terms of traffic management, speed reduction, and safety of road users. The lowering of the speed off the bridge on to Tennant Drive and then up to Summerhill Drive from 70km to 50km would help keep the speed of traffic down. The majority of traffic travel at well over 50km across the bridge in anticipation of the 70km speed after the bridge. Keeping the speed at 50km until JUST AFTER the Summerhill Drive turnoff and then increasing the speed to 60km from there up to and including Predergast Road, would be valuable in terms of consistency of speed on these stretches of road, where there are large volumes of traffic morning, afternoon, and early evening. More speed limit signs need to be placed leading up to the bridge - on both sides - and perhaps painting speed limits on the road and bridge, would be helpful in reminding drivers to adhere to the speed limits. The council also needs to look at the speed limits on Summerhill Drive from Tennant Drive turnoff to just past Johnstone Drive. The speed in that area is too high, is dangerous to both pedestrians and road users alike, and they also need to urgently look at traffic management/flow, especially the intersection of Ruapehu Drive turning onto Summerhill Drive.

General Comments
If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:
The speed limit approaching the Kairanga-Bunnythorpe / Milson Road intersection needs to be changed. If the council puts in an 80k zone 200m

21-5

before this intersection, then turning right onto the Kairanga-Bunnythorpe Road from Milson Line will be made much safer for all users.

Support
Do you support or oppose the proposed speed limit change for Summerhill Drive?
Do you support or oppose the proposed speed limit change for Tennent Drive and Tennent Drive West?
Support
Do you support or oppose the proposed speed limit change from State Highway 57 to Prendergast Road?
Support
If you have any comments to make about the proposed speed limit changes for Tennent/Summerhill Drive, please write them here:
Not sure if this is covered in another section, but the speed limit along Summerhill Drive needs to be reduced to 60km right up to Johnstone Drive. The current 70km limit is in a hagh traffic area, with turn offs to Massey University along SH57, IPU, Summerhill shopping centre, Ruapehu Dr, Pacific Dr, Silkwood Pl, Cashmere Dr, and Johnstone Dr. There is a new child care centre on the corner of Ruapehu Dr, and lots of residential construction in the Pacific Dr / Johnstone Dr areas.

The Proposed Changes: Milson/Bunnythorpe
Do you support or oppose the proposed speed limit change for Roberts Line North (Kelvin Grove Road end)?
Support
Do you support or oppose the proposed speed limit change for Roberts Line North (Richardson's Line end)?
Support
Do you support or oppose the proposed speed limit change for Railway Road?

If you have any comments to make about the proposed speed limit changes for the above roads in Pahiatua-Aokautere, please write them here:
I live up Polson Hill Drive and regularly jog and walk my grand-daughter, in a pram along all of these roads. There are many people who do this on a daily basis, as well as dog-walking and children who walk home from the school bus. These are treated as fast, open country roads by many drivers and yet most of the roads are dead-ends or cul de sacs and all are now heavily populated. We don't have pavements, here, which are really needed for our safety. There are many close calls. I believe the limits should be 50 Km/h and pavements should be considered, at least on one side of the roads, where possible.

General Comments
If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:
The speed limit needs to be reduced for narrow roads on blind corners - especially the bus route road on Kent Crescent which needs yellow no parking on the corner of the bend to allow traffic to safely flow both ways - too many near misses and the bus drivers also drive too fast in this section of road.

If you have any comments to make about the proposed speed limit changes for the above roads in Pahiatua-Aokautere, please write them here:
Kingsdale Park Drive and Especially Westwood Drive is a busy urban like street, being a cul-se-sac often full of hazards (children, bikes, prams, cars backing out of driveways and cars often parking on road) which mirrors businesses of an urban street. 50km speed limit is in my opinion appropriate. The condition of the road is poor, with holes and uneven surface, foot path virtually non existent and unsafe to walk on which means road is often used by pedestrians. 50km speed limit will keep us all safer.

I strongly oppose a reduction on Pahiatua Aokautre road. Until there is an alternative route across the ranges that road should stay 100kmh. Plus for the most part it actually self limits.

General Comments
If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:
Strongly oppose a reduction along Pahiatua Aokautre road

If you have any comments to make about the proposed speed limit changes for the above roads in Pahiatua-Aokautere, please write them here:
I think Kingsdale Park Drive and Westwood Drive should be 50kmph. There are a lot of trucks and building which will continue for at least the next 10 years. The road is windy and often has damaged seal/pot holes. Sun strike is also very common. Cars park on the road which makes it narrow. Children and families bike and walk on the road as there is no footpath and Westwood Drives footpath is unkept and not useable. This is currently very dangerous and I hope this all gets sorted ASAP. The Bush track is very windy this should be 50kmph.

If you have any comments to make about the proposed speed limit changes for the above roads in Pahiatua-Aokautere, please write them here:
Agree with the Pahiatua Track change to 80km/h, though why are you not lowering it to 60km/h as the NZTA tool suggests?

General Comments
If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:
Lower speeds reduce crash severity which is great! Just need to make sure drivers will actually slow down and respect them, so keep traffic calming treatments in mind.

General Comments
If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:
I think before you decide to lower limits, especially in the rural areas, you should come and experience the disgusting and rude behavior if the impatient drivers who don't like the current speed limits. It can be so scary. I dont think they will obey regardless of the new limits

If you have any comments to make about the proposed speed limit changes for the above roads in Milson/Bunnythorpe, please write them here:
This is the only safe spot to pass a vehicle when leaving bunnythorpe towards ashhurst. Lowering the speed limit could cause vehicles to make unsafe passing choices further along the road. ashhurst road is in desperate need of a passing lane or two. Too many stock trucks etc can't make the hill climbs fast enough.

Where is the survey around the new speed bumps in ashhurst? One of them by the library is far too sharp. All others are fine.

As a resident on Polson Hill Drive, I fully support the proposed speed limit reduction. The area is now more residential than in the past. There are no footpaths in the subdivision and there are often families walking on the street. 70 km/h has always felt like a dangerous speed to drive along Polson Hill.

Coming from Summerhill 60km/h to Tennent drive and merging to 70 km/h with and 100 meters further back to 50km/h is confusing and creates dangerous driving. Les able drivers also scared to merge and others directly going to second lane creates a more dangerous situation. Everything 60 km/h or 50 would be better.

On Polson Hill Drive with 100's of houses/driveways and kids on bikes, playing and people walking without a sidewalk 60km/h is still to fast! 50 km/h would be saver and better. This is no longer a desolate rural road!

We are moving into a house in Westwood Drive this year and feel the speed limits in this area are too fast. The Paihatua Track (Paihatua-Aokautere Road) is not in anywhere near good enough state for a 100km road. The shoulders are minimal and there's no allowance for foot traffic back into town either. Would love to see a slower speed limit as well as safety improvements done to the road with better access for walkers and cyclists. There are A LOT of houses going into this area. Council really needs to step up.

Not specifically Ashhurst but Hartwell Drive needs to have the speed limit reduced from 100km/hr to 40km/hr. It is a developing subdivision with a lot of young families who ride the roads to check the mail etc. The speed some cars drive into the area is not safe given the narrow roads. The speed needs to reduced now.

I've lived in Milson for a year, in McGregor Street. There are many trucks, and many people speeding dangerously. We've had our cat killed in a hit and run, and feel that any shift in speed limits around the area. Some speed cameras/speed recorders in the area (as well as trees being trimmed to allow the street lights to light the area effectively- the tree outside our place blocks majority of the light) will make sure we have a safe street to live on.

General Comments
If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:
I have made comments on Facebook before about lack of policing of common roads where issues of speed seem to be prolific, and I have seen an increase in policing. So good to see. My question is are we seeing more accidents or near misses or is this just a perceived issue. Remember taking bends away and widening roads only makes it easier to drive the road faster not safer. And slowing flow of traffic in some situations make congestion and tributary roads even harder to get out of not better.

As the village grows and the number of children and pet walkers increase around the village, we need to ensure a safe infrastructure, slower speeds contribute to that. Winchester Street has become busier due to drivers avoiding the speed ramps on Cambridge, some drivers are ignoring the speed limits, taking advantage of reduced policing in the area. On the proposed changes,

Kiranga Bunnythorpe Rd has two narrow bridges leading in to Bunnythorpe that create a lane compression sensation on approach, please consider widening these bridges to prevent potential collision with wider / larger vehicles coming in the opposite direction. It would make sense to reduce the speed limit into the village about 50M from Te Ngaio Rd intersection.

Hi Leonie,

A few months ago I started writing this with a view to discussing it with someone of influence to make changes. Having seen the survey that has come out I thought it was timely. The comment boxes on the survey only allowed for a specific number of characters so I thought maybe I should send this in as an add on comment.

I'm really not sure who is the right person to send it to or discuss it with but my thinking is you might given your involvement in the survey process.

Anyway it's just my additional two cents worth and I know a lot of these things rely on available funding, data to prove change is necessary and planning, not to mention all the other work required to make changes a reality.

Please feel free to pass this on to whoever might have an interest or if its of no relevance please disregard.

Thank you

Regards

Mike

40-6

Is it just me or are the roads in the Manawatu becoming more risky?

From the archaic law of if you can see 200 m in front of you there's no need to have your lights on, to the illegal practice of driving with fog lights on when the conditions don't demand it – another law that most people won't have heard about. So we have low light early morning conditions, grey cars on grey roads no lights on and hardly visible until the last minute. No consideration for others especially no thought for those who are visually impaired but still legally capable of driving and the elderly drivers whose vision may be not quite as acute as it once was.

This level of inconsideration where people can't be relied upon to use better judgement to reduce risk of collisions needs to be revisited. The 200m visibility law needs to be brought in to the modern driving era. How about a law like the European Laws of lights on all the time, where they can demonstrate a significant reduction in the rate of accidents since this became common practice.

There are a lot of cross roads in the Manawatu on major roads such as Rangatikei Line especially where it intersects with Kiranga Bunnythorpe Road. Having used this intersection regularly it appears the electronic sign that indicates a 70kph speed limit through the intersection is supposed to significantly reduce the risk of collision. I say a roundabout would do a far better job and allow the traffic to do what its supposed to – flow. The level of risk taking and frustration at this and other crossroads in the region that I've personally witnessed is higher that it should be or needs to be, a simple roundabout at major crossroads would keep traffic flowing, significantly reduce the risk taking and the speed at which traffic transited the intersections.

Room for improvement? As the number of vehicles increases on New Zealand roads isn't it time that the Transport Minister and others with the power to influence change consider the use of the free left turn at traffic lights?

While the easiest and cheapest options for traffic control are often implemented ie the slow down to 70kph at the Rangatikei / Kirananga, Bunnythorpe Roads intersection it relies on drivers to actually take the action to slow down, from personal observations not all drivers heed the warning whereas a roundabout becomes a partial barrier and an incentive to actually reduce your driving speed. Maybe it's time for Manawatu road improvements to be reviewed with a focus on future proofing their safety for decades to come rather than a temporary speed limit reduction to 70kph that no doubt become a permanent feature of some intersections.

Ashhurst.

With all the road modifications planned for Ashhurst are designed to make traffic flow through the village safer, it's time to consider the speed limit on Mulgrave St / Ashhurst Road. Currently 50 kph changes to 100kph just prior to becoming Ashhurst Road heading toward Bunnythorpe. Past the 100kph sign we have the partially obscured entry exit point to Hillcrest Road and within 100 m or so on the opposite side of the road we have Harrisons Line intersection with Ashhurst Road. Great geography you may say but my point is the 100kph limit is a highly dangerous speed to be transiting through this section of road, my feeling is that the 100kph speed limit signs need to be moved from its current location to the start of the dual carriageway / overtaking lane. It's purely opinion but wouldn't it be better to limit that particular section of road to 50kph or at the very most 70kph?

Harrisons Line intersection is a tee junction and a give way – Really! A stop is most definitely required, black ute driver, you know who you are please consider how you pull out of this tee junction and take time to look right now and again, it might just be a life saver. As for those heading in toward Ashhurst who decide to cross both lanes at speed to enter the siding that links into

407

Hillcrest Road, again, it's only a matter of time before it goes badly wrong. Slow down, use the proper junction, and signal well in advance. If anyone was in that siding or coming out of their driveways on to it, could you stop in time? I think not.

The point is traffic is increasing, heavier faster vehicles are using our roads, road conditions and layouts, speed limits, lighting are all factors that can increase or decrease the risk of accidents and influence driver behaviour. Planning for future growth on our roads and considering traffic management for the future is a far better use of time and effort than reactive fix its and managing roads and traffic from as an ambulance at the foot of the cliff exercise.

Merge like a zip sign prior to Ohakea intersection heading toward Bulls.

Same sign, prior to Ohakea intersection heading toward Sanson.

If you have any comments to make about the proposed speed limit changes for the above roads in Pahiatua-Aokautere, please write them here:
The nature of the Pahiatua-Aokautere Rd is such that a carte blanche approach to speed limits across its full length is inappropriate. The data states the average free-flowing speed is 72km/h across it's length. I would suggest the average free-flowing speed between Aokautere Dr and Harrison HIll Rd is considerably higher than the average from Harrison Hill Rd to Makomako Rd. The section between Aokautere Dr and Harrison Hill Rd is very comfortably driven at 100km/h but the section between Harrison Hill Rd and Makomako Rd on the east side has many tight, blind corners with recommended speed signs of below 50km/h. I propose to leave the speed limit unchanged up to the Harrison Hill Rd intersection but decrease it to 80 km/h beyond. This is a more common sense approach and will reduce the level of frustration and stress of many drivers.

Hi there

I'd love to see the speed reduced on summerhill drive to 50km/hour at least from the bottom of the hill to the end of the built up housing. We live here and walk/scooter/bike often with our small children. It is amazing how fast people go and it scares me. It also scares me trying to cross the road when taking kids to school on the morning. It is too built up now not to have a 50km speed limit.

Thank you

Ryan Carr

Subject: Draft Speed Limits Bylaw 2020

Good Evening
I would like to place a submission regarding speed limits on Tennant drive contently the speed slows to 70 km at the top of Monroe hill and slows to 50 immediately at the southern end of the bridge where it commences to 70 km the road is dual lanes and has traffic joining and departing at Massey and science centres at 70 and 50 traffic from Massey are joining dual lanes at 50 a bus stop on both sides
I have traveled this road for the last 32 years travelling to Linton including this time when it was single lane and traffic backed up past Massey and up Summer Hill drive and the back entrance of Massey on one occasion it took one hour from Massey to Girls Highschool
My submission is the 50 km speed should commence a lot further south it is unnerving travelling in the centre lane at 50 km with traffic entering town at 70 km with only a white line separting you and the speed would judge higher than 70.
Traffic leaving town will use the inner lane as a passing lane at speed only rejoining just prior to end of lane .
I don't understand why it is should be 70 given that there is pedestrian and cycle traffic to Massey and Science centres and odds of survival are higher at 50 than 70.
Travelling at 50 for this short distance would hardly be an impediment to traffic travelling south as mentioned prior I have travelled this section of road for many years and witnessed many near misses .
This is my opinion and submission and I thank you for the opportunity to view my thoughts
Kind regards
Gordon Bagley

Subject: Draft Speed Limits Bylaw 2020

Hi,

I travel to Massey each day at what would be seen as peak hour race track time.

From around 7am-7:40am the traffic builds and it is literally like a race track. Cars weaving in and out down Fitzherbert Avenue from the Ferguson Street lights to get the best position to get across the bridge and then it's a 100km raceway from the bridge. Cars end up in the University lane so will duck in to get the best position for the race up the hill. And if you "go slow" as in the speed limit you are tail gated and tooted at.

If you want to change the speed limit you need to change the culture of Linton Army as they put people in danger every single day and being in uniform it's not hard to see who the problem is. It's a 70km zone but they're hitting 100km from the bridge.

Thanks,

Nicola

Subject: Draft Speed Limits Bylaw 2020

Tennant Drive is a four lane divided road which is in a mostly non- residential area. I feel that reducing speed this area and addressing the speed limit inconsistencies is lower priority than doing the same for Summerhill /Aokautere Road areas. These roads are only 2 lane and run through a heavily residential area, are heavily trafficked (with new subdivisions and housing being approved all the time making it even more so) and have residential side streets intersecting them. There is a shopping centre, 2 kindygardens, a tertiary institute, a distribution centre, landscape supply business and a coffee cart bordering these roads so we have business user traffic and supply trucks added to the mix. Additionally the Old West Road/Aokautere Drive is used as a bypass by vehicles so there is non-residential traffic to be taken into account too.

The speed limit varies from 60 km along Summerhill, (50kms in side streets), increases to 70 km at Summerhill/old west road (100km)/Aokautere Drive intersection.

I feel stage one changes and safety issues would be better addressed by:-

- Lowering speed limits Summerhill Drive and Aokautere Road to 50kms
- Building a round-about at the Old West Road/Summerhill Drive/Aokautere Drive intersection.
- Moving this to stage one
- Delaying Tennant Drive to stage 2
- Providing more safe crossing areas on Summerhill drive, currently there is one at the shops (which is sometimes blocked by truck and trailer units parking forcing pedestrians out into 70km traffic to see past them) and one near the intersection of Ruapehu and Summerhill drives
- Ideally congestion in these areas would be reduced by a second bridge across the river.

Priority should be given to making residential areas safer first.

Regards
Diane Thomas

I live off Tennent drive on honore, I have lived here close to 10 years! our speed limit need to be slower through here! It's currently 80 but cars fly past 100km + There are school buses and lots of children cross this road. Something needs to be done, slower speed, pedestrian crossing, underpass????
Tokomaru school has one, and we are a much larger community here. We need change.

We want to know whether you support or oppose the proposed speed limit for each of the roads listed below. If you're not sure, or if you don't have an opinion about a particular road tick "not sure." We also want to know why, so please leave some comments to explain why you support or oppose the proposed changes.

Ashhurst

Road	Current Speed Limit (km/h)	Proposed Speed Limit (km/h)	Support	Oppose	Not Sure
Hillcrest Road	100	60	✓		
Mulgrave Street	100	50	✓		
North Street	70	50	✓		
Oxford Street	70	50	✓		
Colyton Road	70	50	✓		
Pohangina Road	100	80	✓		
Bunnythorpe Road (for 150 metres)	100	50	✓		

If you have any comments to make about the proposed speed limit changes for the above roads, please write them here:

I would like the reduction on Pohangina Road to be extended at least until after the right-hand bend (travelling northwards) or further. I know this is MDC, so I hope they come on board. All these changes (above) will make our roads safer. I live up the Pohangina Road & I travel these roads often.

Tennent Drive

Road	Current Speed Limit (km/h)	Proposed Speed Limit (km/h)	Support	Oppose	Not Sure
Bypass Road (off ramp)	70	60	✓		
Tennent On Lane West Drive			✓		
Tennent Off Lane East Drive			✓		
Tennent Drive (from Fitzherbert Bridge to Prendergast Road)			✓		
Tennent West Drive			✓		
Summerhill Drive (from the intersection with Tennent Off Lane East Drive to Tennent Drive and Tennent West Drive)			✓		
Tennent Drive (from Prendergast Road to SH57)	100	80	✓		

If you have any comments to make about the proposed speed limit changes for the above roads, please write them here:

All these changes will make our roads safer. My partner works at Massey & I am very familiar with these roads.

Road	Current Speed Limit (km/h)	Proposed Speed Limit (km/h)	Support	Oppose	Not Sure
Roberts Line North (from Kelvin Grove Road to Railway Road)	100	80	✓		
Roberts Line North (from Railway Road to Richardsons Line)	100	80	✓		
Railway Road	100/70/50	60	(✓)	the 50 section should stay at 50 not go up to 60.	
Kairanga-Bunnythorpe Road (for 170 metres)	100	50	✓		
Campbell Road	100	80	✓		
Ashhurst Road (for 400 metres)	100	50	✓		

If you have any comments to make about the proposed speed limit changes for the above roads, please write them here:

All these will make our roads safer.

Pahiatua-Aokautere

Road	Current Speed Limit (km/h)	Proposed Speed Limit (km/h)	Support	Oppose	Not Sure
Pahiatua-Aokautere Road	100	80	✓		
County Heights Drive	100	60	✓		
Harrison Hill Road			✓		
Ridgeview Road			✓		
Kingsdale Park Drive	70	60	✓		
Westwood Drive			✓		
The Bush Track			✓		
Polson Hill Drive			✓		
Wake Place			✓		
Branksome Place			✓		
Moonshine Valley Road			✓		
Whisky Way			✓		

If you have any comments to make about the proposed speed limit changes for the above roads, please write them here:

I particularly support these changes on behalf of the Tour Aotearoa cyclists on Pahiatua-Aokautere Rd, Polson Hill Drive and The Bush Track. Also all these changes will make our roads safer for all road users (not just cyclists).

General Comments

If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:

(1) I hope these changes come in sooner rather than later. They're excellent.

(2) I hope the people who use the bus stop on York Street have been consulted and that they are not inconvenienced by the change to the bus route if it changes with the change to York Street access (I don't know if it is changing but if it is, then bus users need to be consulted).

From: Submission
Subject: FW: Broadway Avenue

From: Owen Arnst <principal@carncot.school.nz>
Sent: Tuesday, 4 August 2020 9:55 AM
To:
Subject: Broadway Avenue

Hi ... further to my earlier meeting and emails with Chris, I wish to register Carncot School's interest in engaging with the Council's Stage 2 speed limits review, specifically with regard to "expansion of variable speed limits for schools, CBD speed limit."

Please keep us informed when the Stage 2 process is open for our input.

Regards
Owen

If you have any comments to make about the proposed speed limit changes for the above roads, please write them here:

Support the decrease in speed limit
Although outside this the speed limit on Aokautere Drive particularly where school children are crossing the road at Aokautere to the bus stop - needs to be reduced.

The description for Pohangina Road makes no sense and looks like a mistake in this survey - surely it's supposed to be about reducing the speed limit as you enter Ashhurst along Pohangina Rd? This is bad at the moment, far too many cars travelling at 70 or 80k as they wizz past the 50k sign and create danger for cars turing out of North street etc. There should be a 70k zone transition or 80k

51-2

to the district boundary, I live just beyond that and rarely go over 80, yet I am tailgated frequently and people go way too fast along this section of road for the level of traffic, cyclists, etc.

I agree with all of these changes. The proposed change for pohangina road is weak in my opinion. You should take the 50k sign from where it is now and put it at least 150m back down pohangina road. The current placement of it doesn't affect any of us at the start of pohangina road hugely. But just about daily when I exit my driveway I see people go past still doing 100km per hour well into Cambridge Ave. And people heading for the valley are often already doing

I would prefer the speed on Kingsdale Park Drive and Westwood Drive (on which I live) to be reduced to 50km/h. There are an increasing number of houses being built and families moving into the neighbourhood with children biking and others walking dogs. 60km/h still seems too high for this environment which, though rural, is residential.

I believe all speed limits within the Aokautere area (from summer hill to Aokautere school should be in the 50-70km range) many children have to walk along the road where there is no footpath to get to bus stops/school. A footpath has been put in for a section of Aokautere drive but does not continue up the hill to summer hill or Aokautere school. The footpath is also in line with the road (has no guttering so is hard to distinguish from the actual road) It is unsafe to walk along the side of the road with cars and trucks going 70km+ (many do not abide by the 70km speed limit).

General Comments
If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:
To look into the Aokautere/summer hill area more in depth rather than just their surrounding roads

People are already going down Cambridge Avenue at high speeds like 80km/h by the time they get to my house (end of Cambridge just before Pohangina Road). Pohangina Road speed limit needs to be REDUCED, not increased. When I heard Ashhurst was getting speed bumps I hoped that they would get placed near this end of Cambridge to slow down people coming from up the valley, but unfortunately not.

If you have any comments to make about the proposed speed limit changes for the above roads in Pahiatua-Aokautere, please write them here:
A uniform 60 km/h looks clear and easy to understand. If cycle use increases then a further reduction to 50km/h would be ideal

General Comments
If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:
It looks like a general reduction in speed wherever the current speeds are possibly hazardous. A reduction to 40 km/h on all residential roads with designated cycle lanes would be good. Especially if accompanied by reduced car parking on cycle lane routes.

Cars travelling down the hill on Colyton Road are usually going at a hellava speed even when they pass where we live. Oxford Street is like a racetrack for noisy, speeding, hoons day and night. Its only a matter of time before there is a terrible accident. Worcester Street towards Winchester St is another street used day and night for speeding cars. MAYBE SPEED BUMPS ARE NEEDED OR A CAMERA. Because most of what we see are locals. We have reported 2 plate

70-2

numbers to Police who are regular offenders , but nothing has happened, they are still doing it!!!!

General Comments
If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:
Unfortunetly lowering the speed limit on Oxford Street probably will have no effect on the regular offenders, who are locals and seem to think they are entitled. Would be good if Worcester Street Ashhurst could be included in whatever decision is made and works for keeping the speed down.

If you have any comments to make about the proposed speed limit changes for the above roads in Pahiatua-Aokautere, please write them here:
I agree to lowering all these speed limits, but wonder if they should be reduced further in some areas due to major intersections. 1. The Pahiatua Track section where it passes the end of Bush Track should be considered to be lowered further as the right hand turn into Bush Track from the Pahiatua Track is dangerous, there is nowhere to pull over to the left, you have to stop in the middle of the road and therefore hold up traffic doing 80Km behind. (at present it's 100km) Perhaps it should be 60km from the Main Road (Fitzherbert East Road) to past Kingsdale Park Drive and then change to 80km. 2. I would also like to see Bush Track reduced to 50km for several reasons, one it may reduce the amount of traffic that turns off the Pahiatua Track and cut through Polson Hill to come out on Aokautere Drive - they generally speed as they aren't residents and don't seem to care. This is happening more and more since theGorge has closed. Reducing the Polson Hill Drive speed and Bush Track may encourage drivers to stay on the main road with slightly faster limits, rather than cur through a residential area. Also Bush Track is actually a tricky road with blind corners going in both directions.

And this is done not even acknowledging how dangerous Aokautere drive is between Polsen hill and Aokautere school for all cyclists and pedestrians.... with the push for more friendly roads for all this road has been completely overlooked with no room for anyone to walk or ride without risking their life, this is after the recent subdivision and future extra stages of subdivisions of this area and the inevitable roll increase of Aokautere school... what will it take for the Palmerston North city council and the NZTA to take responsibility for this road and upgrade to make it safe for all road users.

If you have any comments to make about the proposed speed limit changes for the above roads in Pahiatua-Aokautere, please write them here:
Polsin Hill Road and side roads are residential rural roads however are heavily populated. The current speeds do not account for the number of pedestrians walking dogs etc. I think the limits should be reduced further to 50kms. Especially in Branksome and bush track road.

Do you support or oppose the proposed speed limit change for Summerhill Drive?
Do you support or oppose the proposed speed limit change for Tennent Drive and Tennent Drive West?
Do you support or oppose the proposed speed limit change from State Highway 57 to Prendergast Road?
If you have any comments to make about the proposed speed limit changes for Tennent/Summerhill Drive, please write them here:
I support these Tennant Drive changes from a driver perspective. The number of different speed zones is unnecessary (in the car our kids even ask why is it changing again) and simplification of this would be beneficial to all road users. I would also support an additional change if reducing the speed limit from 100 to 80km/hr on old west road. Reasons. School area, busy University entrance/exit points and multiple sweeping and hilly corners mean people hardly have ability to get to 100km/hr anyway.

The Proposed Changes: Milson/Bunnythorpe

If you have any comments to make about the proposed speed limit changes for the above roads in Milson/Bunnythorpe, please write them here:
This would provide an improvement on an increasingly busy industrial/rural area. In the past 3 years due to industry creep out this way the tricky intersection of railway rd/Roberts line has become troublesome for getting onto with waves of traffic from Feilding at 100km/hrs. Suggestion an additional measure of dropping the portion of road from Bunnythorpe along Railway road to corner of Railway road/Robert's line be reduced from 100km/hr to 80km/hr for consistency and traffic issues.

Why isn't Aokautere drive speed limit being dropped to 60km/h? There are many houses in Aokautere village and with the increase in traffic it's particularly dangerous for school children crossing the road, cyclists going in and out of town and for cars pulling out of one of the side streets. I support dropping Moonshine and Polson Hill speed limits as there are a lot of walkers and cyclists.

General Comments
If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:
I would also like to see Aokautere drive drop it's speed limit to 60km/h

General Comments
If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:
It is unclear that for the Summerhill / Aokautere area of the city, why Summerhill Drive, Turitea Road and Old West Road have not been given any consideration. Is there a reason for this? Is it too late to add them in to the mix? If so when might they be considered in the future? The 80 km/h limit for the Turitea Road is far too high for such a rural road used widely for passive recreation. It has two single lane bridges (with 2 fatalities at one recently). In the past 3 decades, when heading south, a truck and maybe 5 or 6 cars have sped straight across the opposing lane and over the bank at the top of the first bend. A 45 km sign has been installed that has helped but reinforces why 80 km/h is too high. Being within cycling distance to most of the city suburbs, and walking distance for the many residents who use the network of footpaths around Summerhill and Massey, the road is used regularly for passive recreation. There has been a significant increase in use during the past few years by cyclists, walkers, horse-riders, visitors to Green Corridors, dog-owners, etc. In addition the Te Araroa Walkway goes along the entire length of the road that has many sections without a footpath. Not a good image for the City. School children walk along the road to catch the school bus and others cycle to school. Vehicle numbers, including trucks, have significantly increased as more sub-division development occurs. Reducing the speed limit to 60 km/h (or even lower) is long overdue for this narrow rural road used extensively for passive recreation. Note there are also risks at the intersections with both Old West Road and Summerhill Drive that warrant slower speeds and improved traffic management. There is also a lack of cycle tracks along Summerhill Drive (that at present bizarrely end at the top of the hill) and poor access to Turitea Road. It seems somewhat amazing to me that Turitea Road has not been considered for a lower speed-limit given the dangers imposed.

General Comments
If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:
I also believe the 80km on Milson line from Flygers Line out towards Kairanga-Bunnythorpe Rd should continue out past that major KB road intersection. At the moment it increases to 100km just before the intersection. Seems madness!!! This has also attracted a number of motor vehicle accidents. It seems inconsistent with the other Highway (Rangitikei Line) running parallel. At the Kairanga-Bunnythorpe Road intersection the speed is reduced to 70km. The Railway Road out from the round a bout could possibly be 60km then 80km. Anyway consistency on Highways heading out of town would be fantastic. Thanks.

If you have any comments to make about the proposed speed limit changes for Tennent/Summerhill Drive, please write them here:
I agree that the speed around the summerhill intersection should decrease to 60 as the inconsistency there is not ideal. However I think that SH57-Prendergast Rd does not need a speed decrease. I live in Linton and drive this route multiple times a day, every day, and have never felt unsafe with the speed limit of 100. Changing it to 80 would mean a significant amount of time added to my day, especially when I go back and forth between uni/work and home. I also do not think the speed limit needs to change to 60 on the tennent drive-tennent west drive section. My reasoning for this is same as above, plus the fact that trying to turn right out of Massey during peak hours can already take a long time and results in a lot of backlog traffic through campus. I feel that if the speed limit decreased, this would only exasperate the problem as there are very few gaps at these peak times, as well as a stop sign.

Love the change of Campbell Road, please encourage MDC to do the same from the district boundary to Kung Fu corner. On Railway Road, I see the sense in dropping the 100kmh and 70kmh sections to 60kmh, but why raise the speed limit on the 50kmh section? Seems unnecessary and leaving it as it is won't confuse drivers as they're going to hit/leave a 50kmh zone in roughly that area anyway.

Some of these residential streets should realistically actually go to 50kmh, not 60kmh, but at least the proposed change is better than the status quo.

We as a business a agree in reducing the speed limit on Roberts Line North and Railway Road with the following suggestions: Roberts Line North needs to be 60 km/h due to how narrow it is and with the amount of trucks and cyclists using this road. Railway Road (from Airport Drive to Roberts Line), we agree with the 60 km/h speed limit we just believe it should be extended to 200 meters north of Roberts Line so that vehicles are at 60 km/h before they reach the intersection of Roberts Line and Railway Road.

Be great if Polson Hill and roads off could be reduced to 50. Lots of cyclists and pedestrians including school children catching bus. No foot paths mean lots of people walk on road which can be very scary especially on bends.

Subject: Draft Speed Limits Bylaw 2020

The Ashhurst speed limit change is not in the interest of people living further up the valley and would cause delays in people moving in and out of Ashhurst. I think the speed limit should stay the same and not change.

The merge lane from summerhill down to tennent drive is ridiculous, or at least the drivers are. Buses stay in left lane therefore no movement for merging traffic. Reducing the speed limit would help, even down to 50. Reduction of speed here will not impact on traffic flow, only improve it.

Given 2 more people killed yesterday Roberts line intersection, speed reduction is a no brainer. That being said, accidents happen as cars aren't giving way. Sometimes don't even slow down, I've seen cars hoon straight across. Restrict movement across that road or put barriers/lights in. Only way to stop stupidity.

To: Submission
Subject: Speed limits bylaw
Attachments: speed.pdf

HI there, I am re-submitting by submission from 2019 (attached).

Congratulations on the revised proposals. I would only add

- please consider some compliance mechanisms, e.g. a speed camera on Tennent Drive (maybe with a grace period)

- please ask NZTA to review speed limits the SH 57 portion of Tennent Drive, in particular from the intersection with Camp Road to Old West Road which will now go 80 - 100 - 75 advisory - 80 in the space of a few hundred metres.

Cheers,

Robert McLachlan

109-2

Submission to Palmerston North Speed Limits Review 2019

Robert McLachlan and Steve Trewick
Centre for Planetary Ecology, Massey University

1. We are professors at Massey University interested in local and global environmental issues. We both live in rural Palmerston North (Tennent Drive and Turitea Road respectively) and are potentially affected by the proposed changes. We support the lowering of speed limits.

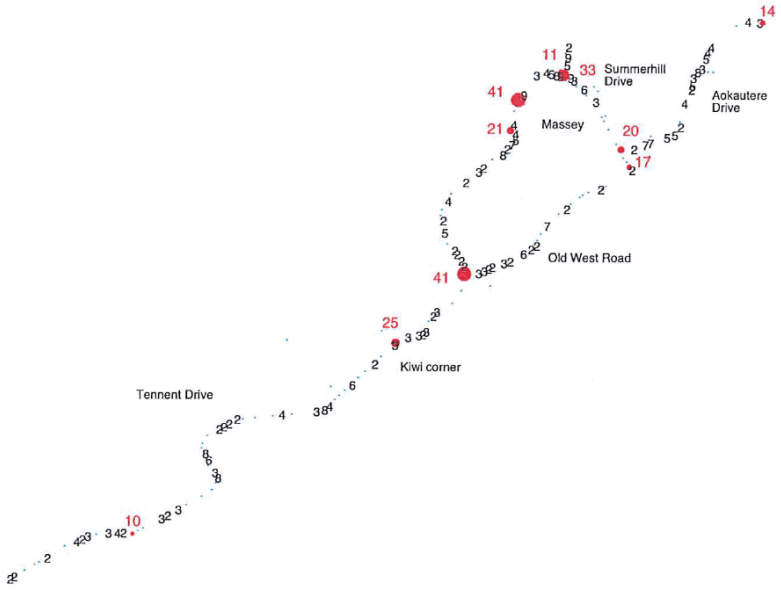

2. While there has been a lot of discussion in the media about speed limits and road safety lately, the public health aspect as not been emphasized enough. Road safety is one of the most glaring public health failures in New Zealand. While disease is a bigger killer than road accidents, it mostly affects the elderly. The median age at death from diabetes, respiratory, or cardio-vascular diseases is 84; from cancer, it is 75. The median age at death from a road crash is 36. (Source: WHO mortality data.) A standard public health criterion is to focus on 'Years of Lost Life', not just numbers of deaths. In New Zealand, 'external causes' (accidents and intentional killing) are the leading cause of death in all age groups from 5 to 45.

3. For a long time, safety has been relatively underrated in road policy in New Zealand. Other factors, such as savings in travel time, have been valued relatively higher, leading to misallocation of resources. Often these travel time savings have been very small and have not materialized in any event, as increased road capacity has caused greater traffic volumes. Fortunately, this whole strategy is now being reexamined.

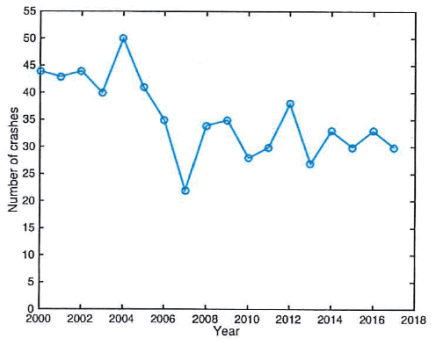

4. The cost of crash repairs in New Zealand is about $480/year per household, partly paid through insurance. The health costs of crashes are $2787/year per household, comprising deaths, serious injuries, and minor injuries. Only a small part (about 12%) of this cost is paid directly by drivers through ACC. The rest is borne by individuals, families, and society. This suggests that halving the rate of crashes in Palmerston North would create shared benefits of about $50m per year. It would be worth investing a reasonable amount of money and effort to achieve that. (Source: Parliamentary Commissioner for the Environment, 2017)

109-3

5. We have mapped the location of the 664 crashes attended by police on SH 57 (from Tane Road to the Pahiatua Track), Tennent Drive, and Summerhill Drive from 2000 to mid-2018. Small dots indicate one crash, numbers indicate more crashes. There are so many crashes we don't even need to draw the road itself:

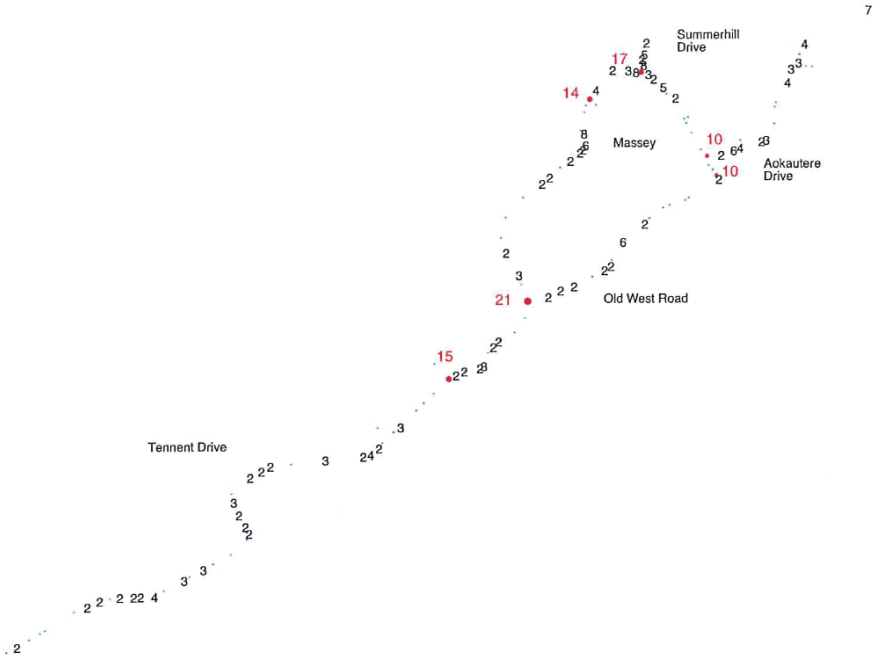

While there are a few crash blackspots, clearly the entire road is a problem. The accident rate fell in the early 2000s but has since remained static:

109-4

Crash locations since 2008 show that the crash blackspots and the overall problem remains, despite some quite large-scale road projects in the area (e.g. at Old West Road). (Note that prohibiting right turns from Massey into Tennent Drive at 183 Tennent Drive was a big help):

6. Clearly Tennent Drive from Old West Road to Massey remains a problem. We support lowering the speed limit to 80 km/h. This will help the situation at the Old West Road intersection as well. Hopefully, with the review of speed limits on state highways, the whole of this section of SH57 can be lowered as well.

7. We support lowering the speed limit on Tennent Drive near Massey to 60 km/h as an interim measure towards lowering to 50 km/h pending redesign of the road layout. This will help the crash rate at Moginie Hill (very narrow with no verge at all for cyclists, and poor visibility), at the Massey entrance, and at the merge with Summerhill Drive. Frankly, the Massey entrance here can be terrifying. Many accidents are caused by vehicles leaving Massey pulling into or across the flow of traffic. The poor design of the northbound cycleway at this intersection means that most cyclists cross the road rather than use the tunnel, and also ride on the road instead of the cycleway. There are particular safety issues here during graduation weeks when students and their families are taking photos.

109-5

8. On Pahiatua Track, and elsewhere, there seems to be a tension between the road assessors, who determine the safe speed for the existing road (e.g. using MegaMaps), and the council proposals, which also take into account the ability to achieve compliance with the speed limits. This tension may not be resolvable through the present consultation. The council should look at a wider range of measures to achieve compliance than just expensive road redesign. Part of this problem is behavioural – in many cities cars will happily travel at 50 km/h on broad, multi-lane arterials, if that is what they are used to and that is what is enforced. Today, an engineer found that a large office building in Palmerston North would be unsafe in a large earthquake. The building was immediately evacuated. Yet, when engineers find that 60 km/h is a safe speed limit for Pahiatua Track, they are ignored, because of the bias towards the existing use of roads in New Zealand. In lieu of other information, we support the engineers' assessment of 60 km/h as a safe speed limit for Pahiatua Track.

9. On the compliance issue, we support the addition of well-signposted speed cameras. The speed camera on Fitzherbert Avenue worked well until it became known that the camera in the box had been removed.

10. Summerhill Drive should be urgently considered in this review. Clearly a massive problem has sprung up here in a short space of time. Rapid development in Summerhill will cancel out any lowering of traffic due to the gorge replacement road. Summerhill Drive is residential along its whole length, with side roads and businesses. It's clearly a 50 km/h max road. There are also plans to improve cycling infrastructure here; unless they include a fully separated cycle path there is no way that 60 km/h will ever be safe for trucks and bicycles to coexist. The road design at the intersection with Turitea Road is a problem too. This intersection is dangerous for cars, bikes, pedestrians, and trucks. There is a dense mix of different users fighting for priority. Creating a single maximum speed of 50 km/h for the whole of the residential area of Palmerston North would make things much safer and less confusing for everyone.

11. In addition to the safety aspect, there are many other reasons to lower speed limits. It creates a calmer and quieter urban environment. It will tend to promote walking and cycling by making them not only safer but also more enjoyable. It reduces greenhouse gas pollution and fuel use. (Note that PNCC has a target of reducing GHG emissions in the city 25% by 2028.) It reduces particulate emissions which have known health risks.

Thank you for the opportunity to submit on these proposed speed limit changes.

Robert McLachlan and Steve Trewick

Subject: Speed Bumps

Greetings

Following up on a PNCC FB post regarding above. I'd like you to look into speed bumps on Broadway between Albert and Victoria, especially around the Carncot School. Children cross that road daily, parents drop their kids off there while cars speed past without any thought. Better to have bumps than a death.

Cheers

Wayne Macpherson

Submission on proposed changes to speed limits on Tennent Drive

Customer Contact Details

Please provide your contact details, and indicate if you would like to speak to the Council in support of your submission. Council will be holding hearings (scheduled for November 2020) where you can come along and speak to the Councillors about your submission.

Full Name: Geoffrey (Geoff) Leighton & Penelope (Penny) Anne Haworth

Disclaimer

Please note, as required by legislation, your submission (including contact details provided on the submission form), will be available to the public and media, and on the Council website as part of the decision-making process unless you request that these details be kept private.

If you wish to keep your contact details confidential, please tick this box. YES

Do you want to speak to the Council in support of your submission? NO

Our detailed submission on this proposal is provided on the following page.

NOTE: While we have said we do not wish to speak to the Council in support of our submission, please feel free to contact us if you have any questions. In addition, if you feel it would be useful for us to attend the Council meeting, we will do our best to make ourselves available.

Geoff & Penny Haworth

112-2

GL & PA Haworth - Submission on proposed speed changes to Tennant Drive

1. **We <u>support</u> the proposal to reduce the speed limit <u>from 70kph to 60kph</u> between the Bridge and Prendergast Road for the following reasons:**
   (a) This change would align with the current 60kph limit on the Summerhill Drive interchange.
   (b) There are several major intersections with the entrances/exits to and from Massey, Food HQ and the Science Centres, which would be better accommodated by the 60kph limit.
   (c) The road curvature, and the lack of a berm on Tennant Drive around the southern hill road circling Massey makes this area more suitable for the proposed speed reduction.

2. **We <u>strongly oppose</u> the speed limit reduction from <u>100kph to 80kph</u> on Tennent Drive, from Prendergast Road to Old West Road, for the following reasons:**
   (a) The Tennent Drive route from Prendergast Road to Old West Road has been well designed with improvements over the years creating gentle bends and wide berms, enabling traffic to travel safely at 100kph. In contrast, it is totally inexplicable why the more winding narrow route from Old West Road to Summerhill Drive (currently 100kph) is not included in the current proposals for a speed reduction to 80kph.
   (b) A speed limit of 80kph is currently in place on Tennent Drive as it passes through the built-up residential area of Linton, an area which is distinctly different from the rural part of Tennent Drive between Prendergast Road and Old West Road (where the same speed limit of 80kph is being proposed).
   (c) The current proposal is likely to cause frustration and confusion, since traffic travelling south on Tennent Drive, beyond Prendergast Road to Linton, would be shifting rapidly from 80kph, to 100 kph, and back to 80kph, over what is a relatively short stretch of road.
   (d) If there is an 80kph speed limit on the section of Tennent Drive between Old West Road and Prendergast Road, there will be a tendency for people to utilize the faster zoned, but narrower, Old West Road route when travelling between Linton and Palmerston North. That raises the following safety concerns:
      i. Turning off into Old West Road will add to the volume of traffic already using this route when travelling to Massey University, and going east to Pahiatua. Increased traffic on the more minor winding 100kph Old West Road section of the proposed east-west link road, despite recent road works to add berms, is likely to result in more risky driving and more accidents.
      ii. Traffic turning off Tennant Drive onto Old West Road when travelling to Palmerston North will significantly increase traffic congestion not only on Old West Road, but also as it merges with the already large quantity of traffic on Summerhill Drive travelling north across Fitzherbert bridge into Palmerston North city.
      iii. Increased traffic on Old West Road, also creates other risks. It should be noted that Turitea School is located on a dangerously narrow bend mid-way along Old West Road, where the current speed limit is 100kph. There is extremely limited off-road parking for parents dropping children off at this school. It is also dangerous for cars turning right into the school during pickup and drop-off, as the right turning lane is not long enough to take a large number of cars. Furthermore, busy traffic flows pose an increased risk for children walking or cycling to school along the berm.

In summary, we **agree** with the speed reduction to 60kph from Fitzherbert Road to Prendergast Road. However, we **strongly oppose** the reduction to 80kph from Prendergast Road to Old West Road as we believe this will lead to significant safety issues **unless** the speed limit on Old West Road is also reduced to 80kph.

Totally agree with a drop of limit on Polson hill. There are many people, including children who walk around Polson hill every day and without any pathways/footpaths it is quite dangerous. I therefore support a drop of the speed limit on Polson Hill.
Kind regards Mandy Mori

Subject: Draft Speed Limits Bylaw 2020

To whom it may concern,
I have lived up Polson Hill Drive, Aokautere for the last 7 years and have noticed since the closure of the gorge, our road has become incredibly unsafe as cars speed up Bush track and along Polson Hill to the main road to beat trucks and slow traffic on the Pahiatua track. On multiple occasions, whilst out walking I have encountered close calls as cars struggle to take the sweeping corner by Branksome Place due to speed. Along our road we have at least 2 children per household who also bike, run and walk along this road to catch school buses and exercise and I worry that one day we will experience a tragedy. As a result I propose that the speed limit is dropped to 50km. I realise that changing the speed limit to 50 km won't stop speeding cars but it may cause them to go 70km in a 50km zone as opposed to going 100k in a 70 km zone which is highly unsafe for this built up area. As well speed bumps would also stop this speeding.
Thank-you for your consideration of my proposal.
Kind regards
Karen Mackay

Good evening,

Is there plans to drop the speed limit in front of Kairanga school? Currently it is 70km/h and surely it should be 40km/h as with other schools.

Also, what is the councils plans to enforce the changes? Will we add speed bumps in front of the schools like you did in Ashurst?

Looking forward to your response.

Thanks,
Deon

Hi,

Leave the speed limits alone, spend the money on the road surfaces, making wider for all tracffic (vehicle's, bike's, pedestrians) & markings first!, then reassess the road after that, changing the speed limit is like using bandaids when you need stitches & doctor.

Regards

George

Hi,

We live on North Street and the 70km speed limit is an accident waiting to happen. Cars fly down this road and we are too scared to let our daughter ride her bike, or even to cross the road to play with the neighbours. Also, our cat was killed by a speeding car, who was going so fast that her neck snapped.

It needs to be seriously reduced to 50, or even less. Speed bumps would also help. Furthermore, we need footpaths on both sides of all of North Street. Not just where the new subdivision is. We like to walk in the evenings and it is just too dangerous.

Thanks,
Christina and Bryant Havill

We very much support moves to slow traffic down and improve safety on the Aokautere- Pahiatua Rd.
We are moving to Kingsdale within the year and every time we go out there it is very apparent that the 100 km speed limit is dangerous. There is ongoing residential development all along the road, so increasing numbers of locals using it. It is an important alternative route too since the Gorge closure, so that increases use further.
Worryingly too there is no place to walk or cycle apart from on the relatively narrow road already occupied by speeding traffic.
These concerns all need addressing urgently.

Thank you.

Not Sure

If you have any comments to make about the proposed speed limit changes for Tennent/Summerhill Drive, please write them here:

In my view the current largest risk in this area is not the speed limit, but the inconsistency of speed limits - specifically the fact that both Tennent Drive heading into the city and the Summerhill Drive are 60kmh at the point where traffic merges, and within an unsafe distance reduce to 50kmh at the beginning of the Fitzherbert Bridge, similarly travelling out of the city to Pork Chop Hill you get to change speed 3 times within ~100m while navigating busy intersections frequently used by cyclists. Hopefully as part of the changes the speed limits (to & from 50kmh) could change at the city side of the Fitzherbert Bridge so drivers concentrating on merging safely don't then have to rapidly reduce speeds.

The Proposed Changes: Milson/Bunnythorpe

If you have any comments to make about the proposed speed limit changes for the above roads in Pahiatua-Aokautere, please write them here:
I do not have any objection to the proposed speeds in the area, but do object to the reason given being reducing the speed on Pahiatua-Aokautere Road will mean that the road does not need to be maintained at the current expected standard, which will save the Council money from having to make the investment to improve the road condition through engineering treatments. Given the increased traffic flow on this road since the closure of the Gorge Road I would suggest that continuing to maintain Pahiatua-Aokautere Road to a 100kmh standard, even if in parts the speed limit is below this is completely appropriate.

General Comments
If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:
It is good that speed limits are being reviewed, however on their own the proposed changes are unlikely to make huge differences. I am also surprised that while speed limits at both Fitzherbert/Summerhill and Aokautere are both

121-5

proposed to drop to 60kmh, the section of road between the Old West Road intersection (another crazy place to change speeds) covering a supermarket opposite the IPU campus, a daycare & kindergarten close to the same intersection, and significant residential development has not been considered appropriate to have a consistent speed limit - but is proposed to remain at 70kmh.

If you have any comments to make about the proposed speed limit changes for the above roads in Pahiatua-Aokautere, please write them here:

I am happy with the reduction in speed along this section of road. It's unclear however what will happen with Aokautere Drive will this be dropped to 50 km/h as it is within the green PN city boundary?. I live on Johnstone Drive and currently the speed limit is too high and there are a high number of pedestrians/cyclists in this area. I would request that the speed limit be reduced to 60 km/h but preferably 50 km/h. I would also propose a pedestrian/cyclist underpass or formal crossing is needed. Especially given the increased construction in this area.

Get the police to actually enforce the speeding in this area. I regularly drive in and out of the city and people drive well in excess of those limits. Those crashes are they due to speeding, then new speed limits will have zero effect on the crashes

If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:
Before you plan speed limits actually enforce the speed limits. There is severe speeding within the palmerston north area. Then check the roads for road repairs

If you have any comments to make about the proposed speed limit changes for Tennent/Summerhill Drive, please write them here:
The speed limit should also be reduced on Tennant Drive from Old West Road out past the Tennant Drive/Hewitts Road/Camp Road intersection. The speed limit on Camp Road as far as the army camp entrances should also be lowered as at certain time (7.30 - 8am) the traffic can be backed up almost to Old West Road & drivers are taking unnecessary risks at this intersection. It is difficult for Camp Road residents to exit their properties due to the present 80km limit & the volume of traffic at these hours.

Aokautere drive from the Turitea road intersection to beyond Cashmere also needs to be 60kph. Cannot understand why this is not included in these changes. The Turitea road intersection with Aokautere/Summerhill drives builds up larges amount of traffic from the South resulting in bad decisions especially if trucks are in the line-up. Slowing traffic from the east would make crossing at this intersection much safer. Monitoring and enforcing the 60 kph needs to be done more rigorously. Especially traffic entering the Manawatu river bridge

Monitoring and enforcing of speed limits must be in this area must be upped. Army/prison personnel often speed along Tennant drive in the going to work and returning from work traffic. Something needs to be done with the Turitea road intersection i.e traffic lights or a roundabout.

Reducing the speed limit below what is suitable for a road increases the variance in speed between drivers, which is considerably more dangerous than everyone going the same higher speed. NZTA guidance on speed limits should be questioned as it doesn't seem to be evidence-based, and likely makes roads more dangerous. A key indicator that the NZTA process is worthless is that speed limits are only lowered and never raised; the new roads between Levin and Wellington and are a good example of a speed limit set blatantly too low. Given the danger of variance in speed, the NZTA needs to consider the natural behaviour of drivers as part of their analysis before it should be used as justification for lowering speed limits, until then the NZTA recommendations are nothing more than a rubber stamp for an agenda of lowering speed limits on all roads.

General Comments
If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:
The whole area from Palmerston North to Bunnythorpe needs to have the speed lowered. The amount of heavy vehicles that are now using these roads and side country roads and speeding is horrid. Too many accidents and near misses on Roberts line as its too narrow from Kelvin Grove rd end through to Kairanga Bunnythorpe rd

Subject: Draft Speed Limits Bylaw 2020

Please can the speed limit on intersection of railway road and Roberts line be reduced and that intersection made safer . My friend recently died in a collision there . My daughter drives that way most days and she finds it a difficult dangerous intersection .

Thank you for your consideration

Kind regards
Julie

If you have any comments to make about the proposed speed limit changes for the above roads in Milson/Bunnythorpe, please write them here:
I would like to see rumble strips heading toward both intersections in Roberts Line. Currently most people who do not use this road regularly do not stop, instead they treat this crossing as a give way and this causes daily near misses for traffic following Railway Road. Also, reducing the speed along both sections of road will hopefully reduce near misses etc, currently I experience a near miss at least once a week with cars pulling out of Roberts Line in front of me. With the introduction of the freight hub it is vital that roading in the area is taking into consideration. Railway Road (in the village of Bunnythorpe) is a 50k speed limit, I live in the street and the increase in traffic including trucks is phenomenal. Not many vehicles follow the speed restrictions so I would like some investigations undertaken to reduce speed in this area as well as reducing the number of trucks that use this road.

General Comments
If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:
I totally support speed restrictions in Railway Road, Roberts Line. I would like the council to undertake a survey of speed and traffic that flow through Bunnythorpe on a daily basis and would recommend the rCouncil, NZTA and the team managing the proposed freight hub take into account this road - the amount of traffic, reported accidents and speed.

Roberts Line North (Kelvin Grove Road end) has a dangerous intersection with Railway Rd. The approach to this should be the same speed as Railway Rd (60km) Also other side of Railway Rd - Roberts line needs to also have a 60km speed limit approaching the intersection as there are lots of trucks pulling out from foodstuffs yard

For consistency think it would be better to change the speed limit on Roberts Line from 100km to 60km also- as otherwise the different speed limits will simply add confusion, Roberts Line is narrow and has several blind dips so 80km is still too high, and also the second entrance to Linklater Reserve has also recently opened and comes off this section of Roberts Line. In addition please work with relevant bodies to improve signage and other safety measures at the intersection of Roberts Line and Railway road, scene of recent tragedy where 2 young doctors died.

I have used the Pahiatua track nearly every day now for the last 15 years, sometimes more than twice both ways for work and running kids to school and after school activities. I have had no problem with it in all these years .... why change a speed limit when you have already admitted that the average speed on this road is 72 km an hour, which would mean that most cars are going that less than the proposed 80km anyway? Why change it for the few motorists who cannot drive to the conditions and their skill level? Most of the accidents that have happened have been on corners that have advisory speed signs in place, how is changing the speed limit to 80 km going to change the habit of poor drivers? They can't follow advisory signs what makes you think they will follow the speed limit? This is now also a highway (since the closure of the gorge) not a residential area. You will get more frustrated drivers by changing the limit who will then make poor decisions re passing slow cars on the Pahiatua side of the track (which in my opinion is worse than the Palmie side of the track). To reiterate, what do you hope to accomplish with this change? I can only see more accidents from frustrated drivers and non compliance to the new limit anyway from drivers who already don't take notice of speed limits and advisory signs. Why punish the responsible motorists for the few who cannot drive to their skill level or experience.

I am not questioning the safer speed changes but the recent obstructions being built on the roads. These planter boxes are a hazard for cyclists and large vehicles. There is not enough space for trucks to drive between these obstacles without one taking evasive action to give way to the other vehicle. Also as cyclists negotiate around these concrete tubs they are forced out into the paths of passing traffic. The boxes should not be opposite eachother but staggered or totally removed. They are dangerous. It is frightening to watch near misses as a pedestrian. Whoever designed this has failed.

If you have any comments to make about the proposed speed limit changes for the above roads in Pahiatua-Aokautere, please write them here:
ABSOLUTELY disagree with Pahiatua-Aokautere rd changes. I drive an old, low powered one-ton truck, and I have no problems, other than the obvious corners, maintaining 100kph in a safe manner. I drive this road very often, and the poor driving skills of some road users are painfully obvious. This is making changes for poor road users, rather than advocating for better driver training. If I can keep up with/overtake you in a 30 year old truck, it's your driving, not mine.

General Comments
If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:
Residential areas, yes. Highways, NO. Advocate for better driver training rather than punish good drivers for the faults of a few.

If you have any comments to make about the proposed speed limit changes for the above roads in Ashhurst, please write them here:
These speed limits make sense, although the 150m changes seem counter-intuitive. Additions of warning signs, e.g. "50 zone 150m ahead" would work better.

Oppose
Do you support or oppose the proposed speed limit change from State Highway 57 to Prendergast Road?
Oppose
If you have any comments to make about the proposed speed limit changes for Tennent/Summerhill Drive, please write them here:
Speed limit changes around the interchange itself make sense, as both summerhill and city directions are both slower and multiple speed changes encourage faster driving. However, in the Massey direction, the road is well-designed for high speed travel, and some simple maintenance and safety upgrades would be a much better investment than slowing people down and ignoring the unkempt infrastructure. The area has few intersections, good bike lanes and pedestrian walkways, and therefore makes no sense as a candidate for reduced speeds. Just make the road safe to drive 70/100 on as is, through maintenance.

Pushing the speed limits away from the village may not solve the problem of vehicles entering the area at high speed. Just add warning signs, and again, patch up the road. The road surfaces around Bunnythorpe are terrible and likely to cause crashes in the future.

If you have any comments to make about the proposed speed limit changes for the above roads in Pahiatua-Aokautere, please write them here:
The Pahiatua Track is a winding country road. Such roads should be approached by any given driver with speeds they feel safe driving. Personally I'm competent with country roads and happily/safely drive over 80 on large portions of this road. Perhaps a better idea would be to add better driver warning signs, and implement new/better turn signage. For the side-roads, anyone using these should be aware of the nature of the area as hilly and winding, and approach the road at their own pace. Admittedly, I don't know all these side-roads particularly well, perhaps if any of them are becoming urbanized it would be a good idea to lower the speed limit as pedestrian and driveway use would become a safety concern.

148-5

General Comments
If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:
Lowering speeds is not a solution in many of these cases. Safety improvements are more expensive, sure, but in many of these cases they're overdue and compounding road safety issues. Improving the roads would therefore make these areas safe at current speed limits. Speed lowering is simply putting a plaster on the situation and walking away.

As we live prior to the 50km sign heading from Ashhurst into Bunnythorpe we support the move of the sign out the recommended change as then the truck engine brake sign would also be moved out to try to make the trucks cut this noise out earlier. Many trucks don't adhere to the sign now but maybe if the sign and speed signs was pushed further out it may cut a lot of noise out earlier

I live on Pohangina Road and have to both pull out and turn in . Traffic travels very fast , often in excess of 100kph on here . I feel my life is endangered both turning in and out of my drive . Fast vehicles appear out of nowhere from Pohangina as the toad is so straight and when I turn into my drive I have to slow , vehicles come up fast behind me and then even overtake as I am turning making this dangerous particularly when visibility is reduced - nighttime or winter

151-2

weather . I would very much like to see a reduced limit past my turning but please make it for the whole straight stretch as far as zig zag road as it's lethal

It is common sense that if accidents are occuring at the intersection of Roberts Line and Railway Road then the speed limit should be the same on all roads leading into this intersection. So 60KMH should be set for both Roads as currently you are suggesting slowing Railway Road traffic when the majority of fault at this intersection comes from Roberts Line. Make the both 60KMH

Tennet Drive/Tennent Drive West is a wide-multilane road, the existing 70 already feels too slow for this section. To manage the Massey/Food HQ intersections, I'd suggest a variable speed limit, such as those at schools, to operate for a length of time around 9am and 5pm, which is when the road is at its busiest.

Railway Road: 60 is too low for this area, 80 would be much more appropriate. But the best thing to do to make this stretch safer would be to redesign the roading in this area. Connect Alderson/El Prado Drive to Richardson Line and then put a roundabout in where El Prado Drive meets Railway Road. Then either close the intesections further north to divert the traffic along the new roundabout, or at least redesign them to prevent right turning traffic into and out of them. That would eliminate a lot of the crashes along here and make it much easier for the heavy trucks to get onto Railway Road. Kairanga-Bunnythorpe Road: Put in a stepped limit instead, such as 70. Campbell Road: There are no houses or businesses down here, so it seems pointless, as a result a lot of people will ignore it and do 100. Ashhurst Road: There is a very sharp corner at the entrance to the village, just after the 50 zone starts, which forces people to slow down to the speed limit, so this is totally unncessary and I don't understand why this is suddenly being proposed. It seems to be trying to fix a problem that doesn't exist.

Pahiatua-Aokautere Road: It's not always supposed to be possible to do the speed limit. People are supposed to drive to the conditions and this road is reasonably well sign posted with suggested speeds for corners and such. I don't see the need for this and it unncessarily slows traffic on the large parts of the

1545

road where it is actually safe to do 100. The increase in the number of crashes isn't surprising given the sudden increase in traffic caused by the closure of the Manawatu Gorge Road.

General Comments

If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:

The proposals are pretty much what I've come to expect from local authorities and the NZTA. I'd be very surprised if you take any of the feedback that opposes the proposed changes on board. I generally oppose anything that is going to add to my commuting time, unless there is a clear safety reason for it. Some of the speed changes do make sense, but many of them are far too conservative. Many of the changes seem to be based on when the roads are at their busiest, but outside of that they make little sense - it seems so pointless crawling along at 50 or 60 in a former 100 zone when there is no-one else around in the early morning/evening. A greater use of variable speed limits would be a more sensible way of dealing with the high crash areas and would be much less frustrating for motorists.

If you have any comments to make about the proposed speed limit changes for the above roads in Milson/Bunnythorpe, please write them here:
(Proposal#1) My recommendation is to close the Roberts Line/Railway Road level crossing to all motor vehicles completely. Leaving a small narrow opening for foot/cycle traffic, this will remove all heavy traffic from the Roberts Line section between Railway Road & Kelvin Grove Road (also partly as by council bylaw/consent my employers trucks are not allowed in this section yet all other trucks are), it will remove a level crossing hazard making it safer for all including Kiwi Rail Locomotive Engineers (train drivers), also if the proposed new Rail yard goes ahead this crossing will be closed anyway - so may as well do it anyway. (Proposal#2) Also changing two if not all three give way signs at the Richardsons Line/Roberts Line intersection from Give Way to Stop signs. If the new Rail yard goes ahead Richardsons Line from Roberts Line to Railway Road will be closed/removed so Roberts Line from from Railway Road will need a major upgrade to take all the new traffic. (Proposal#3) Depending on the proposed new Rail yard I would propose moving the proposed speed limit change point out pass Richardsons Line. (Proposal#5) A reduced speed limit here will also reduce some of the unnecessary/dangerous passing being done by those trying to get pass trucks who are still picking up speed from Bunnythorpe or Rail level crossing intersection. (Proposal#6) I would also extend the 50 KM/H zone further East on Railway Road, as with most of above this would be dependent on the new Rail yard.

Paihatua-Aokautere Road, as a heavy truck driver I suggest reducing this road lower to 60/70 KM/H similar to the Ashhurst Saddle Road.

General Comments
If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:
Human nature & impatience will always come to the fore front, so no matter what measures are brought in, there will still be idiots who treat speed limits as a base line not a maximum limit, but any of the enclosed proposals will make it safer for most of us.

There are not enough places for people commuting to pass slow vehicles on the stretch of road between levin and Palmerston North, adding to this is the frequency of heavy transport, public and school buses all have a speed limit of 80-90km/h restrictions. state highway 57 has 2 safe north bound passing opportunities between levin and Palmerston North. Peak hour commutes often have an adverage speed of 70-90km/h and many people take risks to overtake or can even be in a 10+ long line of traffic commuting. It is frustrating and feels slow, adding a 80k area north of linton will just increase frustration, I agree with the proposed limits around Massey as there are a lot of cars exiting and entering Massey and surrounding places.

I think the only area for concern is the Tennant Drive Interchange. Needs to be a more consistency transition of speed, specially travelling onto Fitzherbert Bridge. People can't merge to save themselves. Vehicles speed up to match or exceed the 70km/h speed, to be smashed straight into a 50 zone. That merge area is just very untidy in general. Tennant Drive out to Linton should be left unchanged. It's an easy stretch of road, that doesn't require a speed restriction to accommodate the conditions of the road.

The proposal for SH57 to Prendergast Road appears to be making a change for the sake of it measured with a risk averse tool. Of course if you lower the speed limit you will reduce the risk however I would need to see some history on this stretch of road that supports dropping the limit before I would support it.

Do you support or oppose the proposed speed limit change for Whisky Way?
If you have any comments to make about the proposed speed limit changes for the above roads in Pahiatua-Aokautere, please write them here:
I agree with all the proposed changes to the speed limit for the roads listed. I would also like to see the Pahiatua - Akoautere Road widened an possible cycle lanes added to this and Akoautere Drive. This area is starting to become much more populated and with more children and families attending nearby Akoautere School safer roads and designated cycle and foot paths would benefit the growing community.

I am a bit confused about the "Pohangina Road: From Oxford Street to Cambridge Avenue | From North Street to Wyndham Street", you wish to increase the speed limit from 70 km/h to 80 km/h..? Or is this a typo?

In my 3 years of living on the corner of Hillcrest Road & Bunnythorpe Road we have helped people out from 3x car crashes and 2x motorcycle crashes from the excess speed / rain factors coming around the corner near Harrisons line. A reduction in speed to 50kms is well needed as it will continue to happen if not changed. The 'off ramp' from Bunnythorpe Rd to Hillcrest Rd (where our driveway is - noted the 'road' was only put there to service our driveway) needs

1652

to be closed off as people just use this road (which according to NZTA & PNCC is not a road) as an on/off ramp so speed up and slow down to either enter or exit Hillcrest Road. According to Chris Lai there is about 10 vehicles per HOUR that use this 'road' past our driveway. That is roughly 100 veicles per day that can cause potential harm to me and my family enetering & exiting our driveway. In the 3 years of living at no.2 we have had roughly 20 near misses exiting our driveway. Hillcrest Road needs to be lowered to 50kms to deter vehicles to use it as a shortcut onto Napier Rd. It needs speed bumps and most importantly a 'no trucks' sign as there are roughly 5x doubled trailers trucks and logging trucks that use this weekly if not daily.

Railway Road From Airport Drive to Roberts Line My response to the statement for the proposal. 1. There is nothing confusing about progressively higher speed limits the further out from the city and progressively lower speeds limits the closer you get to the urban area. The proposed change in the speed limit will not alter the mix of speed limits as there will still be an intermediate speed limit between the 50 km/h area and the 100 km/h area. 2. The proposal will increase the speed limit from 50 km/h to 60 km/h for the area from Airport Drive through the Setters Line intersection to just past The Cutting Way intersection. This is the complete opposite of what the proposal is trying to do. 3. All but a few of the side roads & Private entrances have filter lanes or flush medians for turning traffic and a vast section of the road has the railway line on one side meaning no side roads or private entrances on that side. Also a separate footpath and cycle way exist. These features make the current speed limit appropriate. What should have been proposed is simply extending the existing 70 km/h to the north side of the Roberts Line intersection. Or an even better solution would be to increase the existing 70 km/h to 80 km/h and extend it to the north side of the Roberts Line intersection. This would align the speed with the proposed new speed limit of 80 km/h on Roberts Line and ensuring there is not a mix of speed limits in the area

Brian Smith. The Railway Road/Roberts Line intersection needs two extra turning lanes. When traveling north on Railway road and turning right into Roberts line with on coming traffic people need to completely stop blocking the whole north bound lane. At the same time people are slowing down to turn left onto Roberts line north. There is nowhere for following traffic to go when vehicles ahead stop quickly. Two more people were killed there last week. People on Roberts Line are trying to get across Railway road requiring a jog to the right and with the increased traffic they are taking risks. Trucks entering and leaving the Foodstuffs distribution centre face long waits getting into the traffic and at times just drive out into small gaps. I commute on Railway road daily and have often had to brake heavily or avoid frustrated drivers taking risks. Very seldom have I reached 80 ks/hr by that intersection and so I doubt lowering the speed limit will fix these issues, the infrastructure just can't take the traffic volume.

Decreasing the limits will cause on-going traffic issues - people already speed on these routes so a decrease will lead to a high number of frustrated and dangerous drivers Increase the summer hill drive speed limit to match the areas it connects to - makes more sense to change 1 speed limit than multiplenl others.

PLEASE reduce the speed limits to 60 or even below if you please. I everyday come across speedy cars who're very ruthless and always in a hurry and the possibility of road mishaps always haunt me around the area. I do not feel safe driving from town into Massey at all... especially when the road is too curvy as well. Please, please reduce it quickly and remarkably. Thanks,

To: Palmerston North City Council Info <Info.Info@pncc.govt.nz>
Subject: Draft speed limits bylaw

Re Aokautere roads which are proposed to reduce to 60km/hr: as a resident on Polson Hill Drive, I believe the best speed limit is 50km/hr. This road and others in the vicinity are narrow with no footpaths and few vehicles appear (by my observation) to exceed 50kph. As a resident, I find 50kph quite fast enough on these roads for both safety and practical reasons.

Regards, Russell Richardson

Tena Koutou PNCC,

Thank you for the ongoing investigations to road safety that is happening within our city. My submission is based on the Railway road and Robert's line. Please change the layout or speed and save any future fatal accidents from occurring.
If I may add aswell, the addition of rubble strips is so welcome and I personally encourage this action to be common use in areas where there may be new additions to a road layout. In particular, roads that are commonly used by trucks need rubble strips before new road layouts due to the nature of the job and the slower reaction speed of a truck whilst mainly highlighting that there is less room for error when driving a heavy vehicle.

Thank you

Olivia Bardsley

Good evening,

Please continue with your good work on reducing speed at Roberts Line x Railway Road. If it needs to be made into a dead end to save more lives then I support that in accord with Ms Darcelle Nesser.

Thank you very much,
Dr Eileen Yeoh

Subject: Draft speed limits bylaw

My concern is with Kairanga Bunnythorpe Rd, Milson Line and Rangitikei Line. When Milson Line had 80k introduced the limit stopped before the dangerous Milson Line Kairanga Bunnythorpe Rd (KB Rd) intersection and I assume that is because that intersection is part of State Hwy 54 so out of PNCC's control. Do not create a ridiculous situation where 80k is introduced only along stretches of KB Rd that are not State Hwy as this only creates confusion for motorists. Take extra time if needed to consult with NZTA so the Milson Line intersection can be included in any change and the whole stretch of road can have one speed limit.
Also, ultimately this road will become the new 'Ring Road' which I assume will be constructed to easily cater for 100k traffic so maybe just leave the speeds as they are. When this road is built I suggest large roundabouts be constructed at the now extremely dangerous intersections where KB road passes through Milson Line and Rangitikei Line.

On another matter I'm sure the 'Temporary' signs erected after the **2004** floods on the absolutely neglected Flygers Line can be taken down as I'm sure 16 years goes beyond the definition of temporary.

Do not make changes for change's sake as the Horowhenua DC have done in their area. Reducing speed limits on roads to discourage use which will limit maintenance and push traffic on to busy state highways is a disgrace and should not be motivation to make change. Roads that have been built for 100k traffic should remain at 100k and change should only be implemented where danger exists.

Thank you
Darryl Lark
Milson Line resident

From: Submission
Subject: FW: Draft Speed Limits Bylaw 2020

From: Bernard Linsley
Sent: Wednesday, 26 August 2020 12:33 pm
To: Submission <submission@pncc.govt.nz>
Subject: Draft Speed Limits Bylaw 2020

I am really concerned about the speedimits on summerhill and The Fitzherbert area. There has been an exponential population growth in this area which is set to continue, as more houses are built. If walking then crossing the main road on Aokautere drive from the new end of Johnston drive to get to the summerhill shopping centre is nothing short of Russian Roulette! I submit the speedimit in what is now a large residential area needs to be reduced to 50kph to the junction at Moonshine Valley Road before we see a tragic accident happening.

Regards

Bernard Linsley

Hi,

I agree with all apart from one, the speed limit change which effects the piece of road between SH 57 and Prendergast Rd. I feel as though the speed limit of 100 should not be changed.

Cheers,
Aidan.

PALMERSTON NORTH CITY COUNCIL

PALMERSTON NORTH CITY COUNCIL

183-1

Submission on PNCC Speed Limits Review (Stage 1 – peripheral roads - formal consultation)

Closes 4th September 2020
Email to: submission@pncc.govt.nz

Ashhurst

Road	Current Speed Limit (km/h)	Proposed Speed Limit (km/h)	Support	Oppose	Not Sure
Hillcrest	100	60	√		
Mulgrave	100	50	√		
North	70	50	√		
Oxford	70	50	√		
Colyton	70	50	√		
Pohangina	100	80	√		
Bunnythorpe	100	50	√		

1. I support all the proposed speed limit changes for the approach roads into Ashhurst. They are consistent with slowing traffic as it approaches built-up areas and with levels of roadside development on the northern edge of the 'village'.

2. Additionally, with the road layout changes to Cambridge Ave near the school now in place, it would make sense to make that a permanent 30km/h area. And to have a general speed limit in the village of 40km/h - possibly excepting the rest of Cambridge Ave and Salisbury St as major thoroughfares. Doing so would be in keeping with maintaining a relaxed, people-focused village atmosphere.

Tennent Drive

Road	Current Speed Limit (km/h)	Proposed Speed Limit (km/h)	Support	Oppose	Not Sure
Bypass Rd (off ramp)	70	60		√	
Tennent On Lane West Dr		60	√		
Tennent Off Lane East Dr		60		√	
Tennent Dr (bridge to Prendergast)		60		√	
Tennent WestDr		60		√	
Summerhill (intersection of Tennent Off Lane East to Tennent Dr and Tennent West Dr)		60		√	
Tennent Dr (Prendergast to SH57)	100	80	√		

183-2

3. The names of different parts of the Summerhill-Tennent Drive intersection are not completely clear, despite having been provided with a diagram giving more detail than in the consultation document. For example, Bypass Road is only marked between Summerhill Dr and Atawhai Rd yet probably includes that part of the road between Tennent off lane east Dr and Summerhill Dr.

4. I have appended a diagram which hopefully makes clear the names of different sections of road.

5. Bypass Rd crosses the now very busy Summerhill Drie at the bottom of the hill where vehicle speeds are likely to be at or above the limit. If would be appropriate that the speed limit on both parts of Bypass Rd (between Tennent off lane east Dr and Summerhill and between Summerhil and Atawhai) be no more than 50 km/h.

6. Also Tennent off lane east Dr is a sweeping corner. I frequently ride along it - there are no alternative routes available. Many vehicles come frighteningly close to me in the cycle lane at 60km/h or more. It would be safer and feel a lot safer if the speed limit was lowered to 50 km/h on it.

7. To avoid multiple changes of speed limits or limits applying to only short sections of road, the 50 km/h limit could be extended from the end of Fitzherbert Bridge until 50m beyond the Summerhill Dr - Bypass Rd intersection. Then it could be 60km/h on Summerhill from 50m uphill of the intersection with Bypass Rd. On Tennent Dr/Tennent West Dr the 60 km/h limit could begin/end just after/before where Tennent off lane east Dr leaves Tennent Dr. I include in the diagram the speed limits that I think should apply to the different sections of road.

8. Further along Tennent Dr/ Tennent West Dr, the limit should drop to 50km/h about 100m before the intersection of Tennent Dr/Tennent West Dr and Dairy Farm Road until 50m past the intersection with Main Dr. There it would revert to 60km/h until it reaches Prendergast Rd. The Dairy Farm Rd - Tennent Dr - Main Dr intersection is particularly hazardous and lower speeds in its vicinity will help avoid more crashes there.

Milson/Bunnythorpe

Road	Current Speed Limit (km/h)	Proposed Speed Limit (km/h)	Support	Oppose	Not Sure
Roberts Line North (K-G Rd to Railway Rd)	100	80	√		
Roberts Line North (Railway Rd to Richardsons Line)	100	80	√		
Railway Rd	100/70/50	60	√		
Kairanga-Bunnythorpe Rd (for 170m)	100	50	√		
Campbell Rd	100	80	√		
Ashhurst Rd (400m)	100	50	√		

9. All these changes seem sensible.

183-3

10. However, it is disappointing to not see Kelvin Grove Rd addressed, especially that section with mulitple dips and rises along it beyond Stoney Creek Road. this section has long been idenitified as dangerous. With the increased use of that road now that Hartwell Drive is developed and the narrowness of the road should override the level of roadside development criterion and lead to a lower speed limit (perhaps 60km/h).

Pahiatua-Aokautere

Road	Current Speed Limit (km/h)	Proposed Speed Limit (km/h)	Support	Oppose	Not Sure
Pahiatua-Aokautere Rd	100	80	√		
Country Heights Dr	100	60	√		
Harrison Hill Rd			√		
Ridgeview Rd			√		
Kingsdale Park Rd	70	60	√		
Westwood Dr			√		
The Bush Track			√		
Polson Hill Dr			√		
Wake Pl			√		
Branksome Pl			√		
Moonshine Valley Rd			√		
Whisky Way			√		

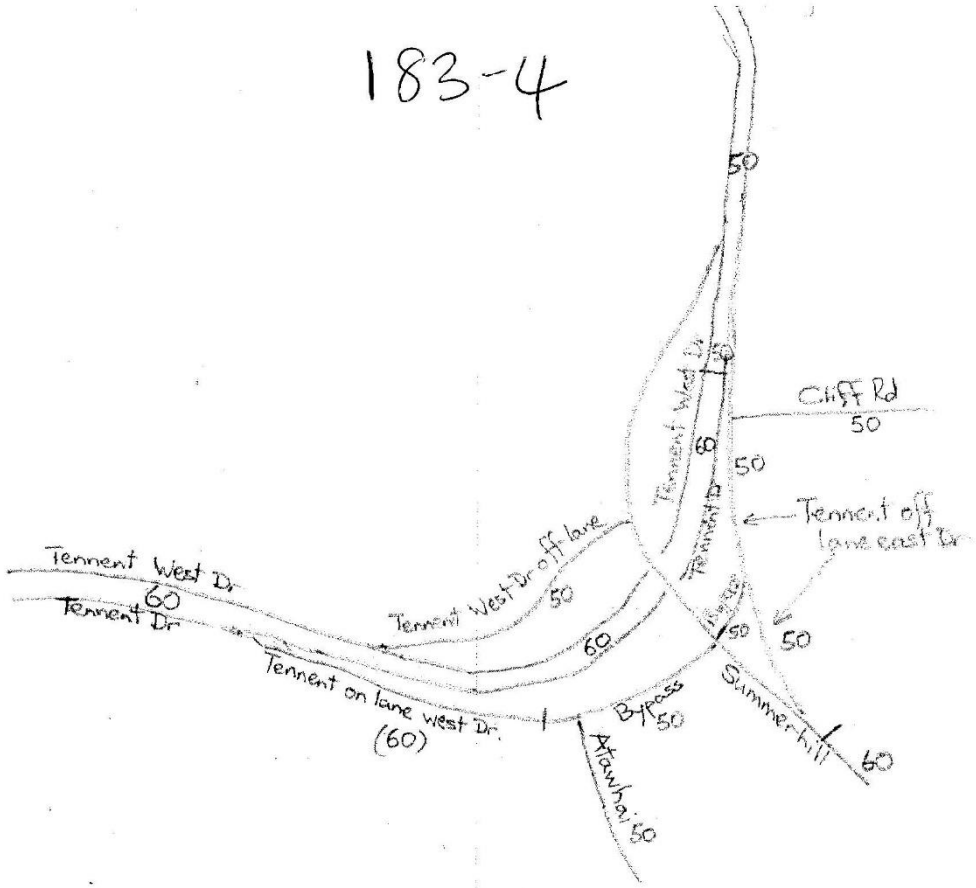

11. All these changes seem sensible although 50km/h would be safer than 60 km/h.

Thank you.

Chris Teo-Sherrell

Do you support or oppose the proposed speed limit change from State Highway 57 to Prendergast Road?
Oppose
If you have any comments to make about the proposed speed limit changes for Tennent/Summerhill Drive, please write them here:
I am opposed to the lowering of the speed limit. I drive that road daily and do not feel it is dangerous when drivers comply with the existing limits. Any dangerous driving I have witnessed is from people who are speeding and lowering the speed limit is unlikely to change their behavior, and will only serve to frustrate compliant drivers. Prendegast Rd -SH57 The dropping of the speed limit from SH57 to Prendegast road is nonsense as there is an 80 km limit through Linton camp, then just over 100 m @ 100km from the Kuhuterewa Stream to SH57, a piece of road that is narrower and windier than the recently built road from SH 57 to Prendergast Road. This road was engineered as a 100km/hr carriageway. Dropping the limit on this piece of the road would be frustrating for drivers and would most likely be ignored. From Prendergast Road to Fitzherbert Bridge In the most, this road is fine except for the turn off to the science centres/Massey. As traffic is likely to increase it would be more prudent to redesign the entry-exit to the science centres/Massey to make it safer, Maybe a roundabout? and widening of the uphill portion of the road. You could also extend the current 70km speed limit to the old Turitea Sawmill site to slow people down around the Massey farm road.

These are fine, Saddle Road needs to be 80kms down the bottom. 60kms makes drivers pass illegally and dangerously and is an accident waiting to happen. Being a truck driver i see this first hand.

Tennant Drive from the bridge to Massey we support a reduction to 50 KPH if that's possible because the turnoffs into Dairy Farm road, Bledislow park and Massey are hard to use with traffic approaching at 70kph and while 60 kph is better it's still fast for a campus and Food HQ area

Stop wasting money changing speed limits for no reason, and spend the money on fixing the roads properly. Maybe change some of the blind corners around that area and fix the potholes. The only accident I've ever nearly had on Tennant Drive wasn't because of speed, it was because the other driver was a fucking idiot who didn't look before changing lanes. Unless you think lowering speed limits makes people less stupid, it won't help.

Roberts Line North from Kelvin Grove Road to Railway Road Please further reduce the speed limit from 100km to 60km. At a recent community meeting in Bunnythorpe in August, there was strong community support to reduce the speed limit along this road to 60km instead of 80km. It is important that this section of road is the same speed as the new 60km limit on Railway Road to avoid driver confusion. Confusion will add to the risk of another accident at the intersection, and sadly there have already been so many here, including 3 fatalities. It also needs to be the same speed as Railway Road to prevent drivers taking this route as a faster option – Roberts Line is a much narrower and more dangerous road than Railway road, and involves a railway crossing – encouraging drivers to take this route is not a good plan! Furthermore, this section of Roberts Line: • Has several blind dips – one cannot see traffic ahead, including cyclists, when at the bottom of a dip • Is narrow and has both trucks and cyclists traversing it • Contains the second entrance to Linklater reserve. This was opened in early 2020, and is becoming increasingly popular with cars often pulling off the road and parking here. When the Shearing Shed project, located at this end of the reserve, and aeroplane sculpture are completed, the entrance is likely to become even more popular • Has tricky intersections at both ends of the segment To avoid further accidents, please further decrease the speed limit to 60km.

General Comments
If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:
One further comment regarding the speed limit changes for the Railway road – Roberts Line intersection. Please can the changes be made AFTER the intersection on the Bunnythorpe side. So that drivers are not speeding up as they come from town towards the intersection – especially as there is no turning lane into Roberts Line from Railway road, and a tricky railway crossing and uneven piece of road to navigate too! Thank-you for making these changes to make our roads safer – it is heartbreaking to have had 3 fatalities occur near our house in the last 18 months. Lower speed limits would have likely prevented all three. We are appreciative of the changes being made now to prevent more tragedies in the future.

Hi, the 150 metres up Colyton Rd (to Oxford/North St intersection) probably needs to be a bit further back, or maybe 60km from Grove Road - that road is too narrow and people don't stay on their side of the road treating it like a slalom track. I worry about the school bus going to and fro Feilding Ag- I live in Oxford St and it is seriously scary hearing all the boy/girl racers literally race up and down that hill. They don't care - there will be fatalities on that hill soon and it'll probably be someone's grandparents or child heading to school. ☹

Not Sure
If you have any comments to make about the proposed speed limit changes for Tennent/Summerhill Drive, please write them here:
The Tennent/Summerhill Drive interchange speed changes from the bridge at 50 to 70 then 60 to go up Summerhill Drive is very confusing. The road is also used by bikes and pedestrians with no footpath available on the left side of the road when heading up the hill. Boy racers also come up these roads at speed. I strongly support speed reduction here. Moreover, exiting Massey or the Science Park and crossing the traffic can be difficult with the peak traffic at high speed.

If you have any comments to make about the proposed speed limit changes for the above roads in Milson/Bunnythorpe, please write them here:
Roberts Line North from Kelvin Grove Road to Railway Road Please further reduce the speed limit from 100km to 60km. It is important that this section of road is the same speed as the new 60km limit on Railway Road to avoid driver confusion. Confusion will add to the risk of another accident at the intersection, and sadly there have already been so many here, including 3 fatalities. It also needs to be the same speed as Railway Road to prevent drivers taking this route as a faster option – Roberts Line is a much narrower and more dangerous road than Railway road, and involves a railway crossing – encouraging drivers to take this route is not a good plan! Furthermore, this section of Roberts Line: - Has several blind dips – one cannot see traffic ahead, including cyclists, when at the bottom of a dip - Is narrow and has both trucks and cyclists traversing it - Contains the second entrance to Linklater reserve. This was opened in early 2020, and is becoming increasingly popular with cars often pulling off the road and parking here. When the Shearing Shed project, located at this end of the reserve, and aeroplane sculpture are completed, the entrance is likely to become even more popular -Has tricky intersections at both ends of the segment To avoid further accidents, please further decrease the speed limit to 60km.

General Comments
If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:
One further comment regarding the speed limit changes for the Railway road – Roberts Line intersection. Please can the changes be made AFTER the intersection on the Bunnythorpe side. So that drivers are not speeding up as they come from town towards the intersection – especially as there is no turning lane into Roberts Line from Railway road, and a tricky railway crossing and uneven piece of road to navigate too. Thank-you for making these changes to make our roads safer – it is heartbreaking to have had 3 fatalities occur near the house of our close friends in the last 18 months. Lower speed limits would have likely prevented all three. We are appreciative of the changes being made now to prevent more tragedies in the future.

If you have any comments to make about the proposed speed limit changes for the above roads in Milson/Bunnythorpe, please write them here:
Railway Rd from the airport through to bunnythorpe needs to be 70 all the way after foodstuffs building to bunnythorpe. There are to many turn offs and there is no exit or entry lanes to or from them. The road leading from Kelvin Grove Rd to railway Rd should be a dead end and only accessable from Kelvin Grove Rd. The intersection leading into railway road is very hard to navigate on a good day.no proper road markings no extra wide lanes for waiting traffic to turn therefore no other Lane to navigate passing turning traffic.

General Comments
If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:
The max speed limit in any area needs to be managed and inforced correctly. You can have as much signage up as you like but if the police are not ticketing speeding then people won't care. Speed camera need to return. Heavier fines straight away and for continued abuse of spending infringements further action loss of licence and or car taken.

Going out towards Pohangina Valley when Cambridge meets Pohangina road. I propose that the 100km speed limit sign be moved back a couple of hundred meters, extending the 50km speed limit out a bit. We have so many people speeding up to 100+ even before the end of Cambridge road. It is unsafe as there are many animals and children in the area that walk and ride their bikes. Also, taking into consideration the new developments on North Street. I

197-2

propose the possibility of a speed camera at the corner of North Street and Pohangina Road.

If you have any comments to make about the proposed speed limit changes for the above roads in Ashhurst, please write them here:
I support a speed change on Mulgrave Street but feel 70km/h would be better to reflect the lack of entries and exits on this piece of road but still make it safer for people to use Hillcrest Street. Also, as this is also a climb heavy vehicles maintaining 50km/h will effect other traffic as they will not build speed and cannot be passed until the passing lane further up the hill, the time taken for the vehicles could stack up multiple vehciles behind and this being a short passing

198-2

lane could create unsafe overtaking at the end of the passing lane and further along Bunnythorpe Road as the traffic seeks to pass the heavy vehicles. All other suggestions are acceptable in this area.

If you have any comments to make about the proposed speed limit changes for Tennent/Summerhill Drive, please write them here:
I support the simplification of speed limits from the Manawatua river bridge to Summerhill Drive and the suggestion to change this to 60km/h is good. I do not feel there is a need to maintain a reduced speed limit beyond the Massey University entrance though as it is a rural road effectively beyond this point. The speed limit should remain 100km/h south of the interchange to access Massey University.

If you have any comments to make about the proposed speed limit changes for the above roads in Milson/Bunnythorpe, please write them here:
My key focus on this area is to support the suggestions. Having attended the recent incident where 2 people died at the Roberts Line/Railway Rd interchange, and being a regular user of Railway Road and entering/exiting El Prado drive I agree that the speed limit suggestion to change the speed limit to 60km/h on Railway Road between Airport drive to Roberts Line is the right change. The intersection at El Prado drive has a number of heavy vehicles leaving El Prado which is set to increase in the future and the 70km/h current speed limit and high traffic volume creates congestion and near misses regularly. I am happy to attend a meeting with other key businesses in the area to make a joint submission in support of this change. The other businesses in support are: Countdown, DKSH, Foodstuffs and First Union and I represent TIL Freight. The other suggestions in this area are also supported as they except the change for 400 meters on Ashurst Road entering Bunnythorpe which is too long and needs to be reduced to 200 meters maximum or introduce a 70km/h at 400 meters and retain the 50km/h as-is.

Old west road should also be reviewed. There are a number of driveways with poor visibility and cars go very fast past the primary school with parents often needing to park on the road when the school has events or assemblys etc.

The speed limit for all these rural rd's should be 70kph as it to me is appropriate and would save the rate payers money for the sake of a 10kph reduction in most case's

General Comments
If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:
People's life's matter but don't change things just because you can and because other councils are doing it, for the sake of 10kph reduction why bother as there is a cost in sings and for the contractor who does work on the roads for the council. It could be sometimes better spent on education and sometimes people just need to learn how to drive !! and to the conditions of the road they are on

If you have any comments to make about the proposed speed limit changes for the above roads in Milson/Bunnythorpe, please write them here:
Roberts Line North from Kelvin Grove Road to Railway Road: Please further reduce the speed limit from 100km to 60km. At an August community meeting in Bunnythorpe, there was strong community support to reduce the speed limit along this road to 60km instead of 80km. It is important that this section of road is the same speed as the new 60km limit on Railway Road to avoid driver confusion. Confusion will add to the risk of another accident at the intersection, and sadly there have already been many here, including 3 fatalities. It also needs to be the same speed as Railway Road to prevent drivers taking this route as a faster option – Roberts Line is a much narrower and more dangerous road than Railway road, and involves a railway crossing – encouraging drivers to take this route is not a good plan! Furthermore, this section of Roberts Line: Has several blind dips – one cannot see traffic ahead, including cyclists, when at the bottom of a dip Is narrow and has both trucks and cyclists traversing it Contains the second entrance to Linklater reserve. This was opened in early 2020, and is becoming increasingly popular with cars often pulling off the road and parking here. When the Shearing Shed project, located at this end of the reserve, and aeroplane sculpture are completed, the entrance is likely to become even more popular Has tricky intersections at both ends of the segment To avoid further accidents, please further decrease the speed limit to 60km.

General Comments
If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:
One further comment regarding the speed limit changes for the Railway road – Roberts Line intersection. Please can the changes be made AFTER the intersection on the Bunnythorpe side. So that drivers are not speeding up as they come from town towards the intersection – especially as there is no turning lane into Roberts Line from Railway road, and a tricky railway crossing and uneven piece of road to navigate too! Thank-you for making these changes to make our roads safer – it is heartbreaking to have had 3 fatalities occur near my parent's house in the last 18 months. Lower speed limits would have likely prevented all three. We are appreciative of the changes being made now to prevent more tragedies in the future.

If you have any comments to make about the proposed speed limit changes for Tennent/Summerhill Drive, please write them here:
60km is too fast for Summerhill. It's a residential area and we should have the same protection as other residential areas. Many drivers exceed it, including trucks. The speed, plus cars parked along the verge, make turning out of driveways hazardous, especially at peak times when the volume of traffic is high. Housing development at the end of Pacific Drive and off Johnston has seen the traffic volume increase significantly in 4 years. As more sections are built on this can only increase and presents a real risk to those who live on the main road, and those on the adjoining streets. Cars parking to visit local businesses, or turn into them, create a bottleneck. Combined with the speed and volume of traffic, it's only a matter of time before there is a serious incident between vehicles, or vehicles and a pedestrian given that the local bus stops are well used by local high school students. Please slow the traffic down, and improve parking and/or access into and out of local businesses. I've witnessed too many close calls.

Not Sure
If you have any comments to make about the proposed speed limit changes for Tennent/Summerhill Drive, please write them here:
I have used the Massey University-Tennant Drive exit regularly over the last 20 years. The problem, as I see it, is not the speed of TD per se, but the very poor design of the Massey/Tennant Drive/AgResearch complex of interchanges. Most of the accidents that I have seen (many) have been due to people mistaking the direction of traffic over these interchanges. By far the best solution would be to make a large roundabout that incorporates Tennant Drive, Dairy Farm Road, the Main Drive entrance/exit to Massey and the entrance to the little Bledisloe park car park. Changing the speed limit might make a little difference, but untangling this mess of short roads whose priority over each other is extremely unclear, would probably stop the plethora of accidents that occur here.

I wish to comment on the Bush Track/Polson Hill Drive segment. I have lived at the intersection of TBT and PHD for over 20 years, so have seen a lot of risky driving. I think that the reduction of the speed limit is a good idea, but I don't think that it will fix the problem. Most of the residents of the subdivision drive, at 50-70 kph; and most drive considerately around other users. Vehicles that pose hazards seem to be related to non-resident and through traffic (i.e. avoiding the Pahiatua Track-Aokautere Drive intersection): (i) heavy good vehicles. Whilst these mostly drive responsibly, the roads are not designed for HGVs. I suggest that excluding all HGVs (except for reasonable access) would deal with that problem. (ii) non-resident vehicles that use the loop as a cut off; whose interpretation of the speed limit is much more 'liberal' than that of residents. (ii) a small number of cars who drive very dangerously, especially on the bends of TBT and the western end of PHD, and especially at the intersection of TBT and PHD. I doubt that reducing the speed limit would make any difference, as they

207-5

appear to drive well above the present limit anyway. Extreme traffic calming measures which would make it impossible to exceed the speed limit (60 or 70), would achieve a better result with (ii) and (iii) than just changing an (unenforced) speed limit. In summary: i) Make PHD-TBT access only, especially for HGVs ii) Curtail speed through extreme traffic calming fixtures

If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:
Because of the increase in accidents in Palmerston North and surrounding area's we would have liked to see more changes made in Palmerston North and surrounding villages to the speeds in "residential" area's. Also we would have liked to see a more progressive approach to have large trucks kept out of the city area's through weight restriction.

Subject: Draft Speed Limit Bylaws 2020

Thank you for giving us the opportunity to submit on the PNCC Speed Limits Bylaw.We commend you on indicating that you would lower the speed limits within our city as a reflection of public feedback and also because this in keeping with policies to make cities safer for people.
Speed really does kill and every life matters.According to the WHO for every 1% reduction in speed there is a 4 % reduction in fatalities.
Reduction in speed can be the difference between a correctable mistake,injury or death.
As road users we need to change our attitude to speed for this reason.We think all New Zealanders would like to see fewer injuries and deaths on our roads.Reducing our speed limits would be certainly help promote this behavioural and attitudinal change.

Speed reduction would be in line with the Government's "Road to Zero" policy that no death or serious injury is acceptable and to lower speed limits in urban and school areas.Reducing speed is part of internationally successful strategies which have reduced injury and deaths on their roads.Places like the UK,Ireland and Sweden have achieved reductions in fatal and serious injuries by 40 % or more within a decade with their Road Safety policies. (from AA magazine summer 2019).

Reviewing the PNCC Draft Speed Bylaw and reading research on this matter we feel that in most cases the speed could be reduced further which would benefit people by decreasing our rate of injuries and deaths even further.Firstly because it is known that for every 5km/hour decrease in average speed there is a 28% reduction in fatal crashes and a 20% reduction in serious injury (International Transport Forum 2018).Secondly because the speed you are travelling dictates what happens if you hit someone and the time it takes to react.For example it takes at least 36 metres to stop if you are travelling at 60 km and at least 27 metres at 50 km/hour.It is also known the probability that a pedestrian will die or receive serious injuries rapidly increases with relatively small increases in speed if stuck by a car.It doubles between an impact speed of 30 km/hr and 40 km/hr and doubles again between 40km/hr and 50 km /hr.For the vulnerable such as children and elderly the impacts are particularly high.

People may argue that it will take much longer to get somewhere and that time is money but research has shown that this is often over estimated especially when other factors such as traffic lights and congestion are factored into the journey.An NZTA study of NZ cities tracked travel times for short and long journeys found that drivers only saved 1.08 minutes by driving 10 km faster.Is that really worth the cost of a life?.

Crashes also cause significant physical,mental and emotional harm as well as additional economic costs as a result of lost productivity.A research project (Report 582 May 2017) commissioned by NZTA found that lowering the speed limit did not harm the economy and while it increased travel times by 10 % it reduced fuel costs by 15 % when maximum speeds were dropped from 100km to 80 km.

As stated previously while we agree with the reduction of speed we would like the speed limits reduced further in line with research and to show that the City Council is taking a lead and showing that people's lives matter.
As our city's population grows and expands we need to future proof our roads for increased volumes of traffic as well as making provision for different modes of transport such as Active and Public Transport so people have a choice how they move around the city.We also need to reduce congestion as well as meet our obligations to reducing carbon omissions,keeping people safe and making the city a healthier place to live,work and play in.

211-2

With all this in mind we would therefore like to see :

1•Maximum speeds dropped from 100km to 80 km on roads such as Pahiatua - Aokutere Road and Pohangina Road.

2•Buffer zones between a rural area or highway when entering an urban area to be reduced further to 60km and then to 50 km when in an urban environment such as from Pohangina to Ashhurst prior to North Street and along Campbell Road before coming into Bunnythorpe.Drivers also need to reduce speed further and earlier along SH2 when entering Palmerston North especially due to increased urbanization and traffic movements prior to getting to James Line.

3.Any urbanized area set at 50 km/hour rather than 60km for increased safety and to ensure compliance by keeping it simple and consistent rather having too many mixed speed limits within urban areas.
Examples would be :
• Hillcrest Road (SH3) to Mulgrave Street

•Tennant Drive in its entirety from the city to Sheep Farm Road in recognition that it is part of the city and with its increasing connectivity to the city.In the future it is only going to get busier
because of new development within Massey and Food HQ.It already has a medium to medium- high risk rating at the moment so with increased traffic and usage throughout the day and night as well as an increasing amount of foot and bike traffic that risk can only increase unless speed is reduced.It is also one the gateways to our city so it needs a slower buffer zone when approaching Massey from Linton prior to Sheep Farm Road.

•Summerhill in its entirety for the same reasons as above because although like Tennant Drive the off ramps and rural feel makes it seem like it is a highway it is in fact a suburb which is growing with a greater risk because it's leads out of the city.

•Railway Road and Airport Drive has recently seen further deaths and this is not acceptable when we have the power to make a simple change to reduce speed which would help prevent further injuries and deaths.It is a busy arterial into the city with lots of side roads which is only going to get busier with further developments such as the transport hub,increasing population and urban spread.Also the multiple speed limits along the road is confusing and the higher speed are unsafe for the conditions.

•Kairanga -Bunnythorpe road.

4•The proposed variable speed zones changed to be permanent and reduced to 30 km/hour to ensure maximum safety,compliance and consistency.We would like these areas to be extended in
around schools as a buffer zone to ensure drivers comply and safety is maximized.Extended because people do not just disappear within a short distance of the schools.For example people can be seen getting in and out of cars and walking further down Featherston Street and the side streets such as Taonui and Lombard.Also PNBHS and QEC students often transition through Featherston Street via footpaths and on bikes.
Schools are not just used during school hours as they are utilized out of hours by children and the community and are often in busy mixed urban /business environments.Motorized and foot traffic don't stop just because schools out.
Central Normal School is a good example of this being on a main throughfare with lots of side roads and therefore intersections and near multiple businesses and shops such as McDonalds and Countdown which operate day and night.We feel it needs to have permanent zoning of 30 km and extend further to incorporate the shops and businesses and busy intersections.We would like to see a 30km zone along Featherston Street to beyond Wood street and beyond PHBHS past Trenton Minimart.Also the safe zone needs to extend along the entirety of the side streets such as Taonui,Lombard and Campbell to Waldergrave and on the other side to take in all of Beresford and Aroha Street.

PALMERSTON NORTH CITY COUNCIL

211-3

We would also like the zoning to be extended to other high risk environments where there are high volumes of people who are likely to be transitioning through on foot or bike and feel this is particularly important for the vulnerable populations such as children,the elderly and disabled.These areas include Daycare Centres,Kindergardens,Retirement Villages,Hospitals,and Playgrounds.This 30 km speed limit zoning around high traffic areas should be set throughout the city including the CBD and would be in line with other cities around New Zealand.
We feel that having this speed limit in high traffic areas is not too low as it ensures maximum safety without traffic in reality slowing down further as according to NZTA ("Mythbusting speed" retrieved from NZTA website) if the maximum speed around town is 50 km the actual speed travelled is between 26-33 km/hr.

Thank you for taking the time to read our submission.

We do not wish to speak to the council in support of our submission.

Many Thanks
Anne and Liz Clouston
Palmerston North Residents

Subject: Draft Speed Limits Bylaw 2020 Submissions

To whom it may concern.

I am a resident of Kingsdale Park Drive.
I support a reduction of the speed limit for this road to 60 km/hour

Information supporting this submission:

- When leaving my driveway visibility is about 50 metres in either direction. (See attached photographs) That is just 3 seconds to see and avoid oncoming vehicles moving at 60 km/hour.
- Ongoing development means significant numbers of heavy vehicles on the road

Two requests to be considered:

- Place concealed exit warning signs
- Occasional enforcement, particularly at peak times

With thanks

John Higgins

Subject: Draft Speed Limits Bylaw 2020

Importance: High

Hi,

I am writing to you as the LNI DC Manager for Foodstuffs NI, where we have a sizeable centre on the corner of Railway Road and Roberts Line. I understand that there is a proposal to look at reducing the speed limit from 100km/h to 60 km/h from Railway Road to the corner of Roberts Line. I would ask that that proposal be extended to a minimum of 500 metres beyond the corner (intersection), in all directions. Indeed, given the state of the road and the consistent use of it by vehicles, I would also like to see the 60km/h applied to the Roberts Line segment of the road that you enter once you turn off left on Kelvin Grove Road also; the growing number of cyclists using the road is reason enough to suggest that 60km/h is much more appropriate.

I would be more than happy to front the submission on the date in question, but please can you give consideration to the requests made in the aforementioned.

Cheers,

Aaron Fairburn,
DC Manager

Subject: Draft Speed Limits Bylaw 2020

Morning.

I have only a few thoughts to add to what council is proposing.

1. Colyton Road. You are proposing extending the current 70 kmh 150 m. Why not, since it is an area that is not safe to drive at 100, extend the 70 kmh zone to Grove Road at the top of the hill, and then to 50 at North Street as proposed.

2. Bunnythorpe Road/ Mulgrave Street. You are proposing a 50 kmh zone out to Harrisons line. Why not mmke this a 70 kmh zone as in (1) above or if you are changing Hillcrest to 60, put that entire area to 60. Keep some consistency

Thanks for your work

Neill Smart

From: Submission
Subject: FW: Robert's Line North intersection with Railway Road
Attachments: Proposition.png

From: Chandula Wijeweera
Sent: Friday, 4 September 2020 11:29 am
To: Submission <submission@pncc.govt.nz>
Subject: Robert's Line North intersection with Railway Road

To whom it may concern,

I am writing in regards to the proposed changes for the stretch of road surrounding the intersection between Robert's line north with railway road. I am much invested in this area given the death of my friend and colleagues, Dr. Vinay Angadi and Dr. James Huang in motor vehicle accident in August of this year. The accident that lead to their demise should not have happened. There were already red flags in that area given the previous death of a tourist and the number of near misses and crashes that occur as a result of the intersection and the state of the roads there.

My proposition seeks to further the already proposed changes.

Firstly, a blanket 60km/hr in the surrounding area is not nearly enough to address the safety concerns. Given the mass of on-going trucks, even if they were going 60km/hr, there is unlikely to be a sufficient enough window for them to slow down to a speed that would allow for appropriate stopping if an accident were to develop. Therefore, I propose the speed should be dropped further to a 50km/hr zone.

On top of this, adjustments to the intersection need to be made. I propose that the Robert's line section coming into Railway road from Kelvin Grove should be cordoned off complete thereby making this intersection a T intersection and preventing further confusion with the slanted nature it currently has. If this is not possible, I propose that the Roberts Line section coming in from food stuffs be realigned by closing the original access point and forming a T intersection as I have attached to this e-mail.

Far too many lives already been lost to this poorly constructed stretch of road and it frustrates me everyday that change is not made as I see the victims of these crashes (if they are lucky enough to survive) every day in our emergency department. I emplore you to listen to the voices that make these submissions and I hope that meaningful change can finally be enacted.

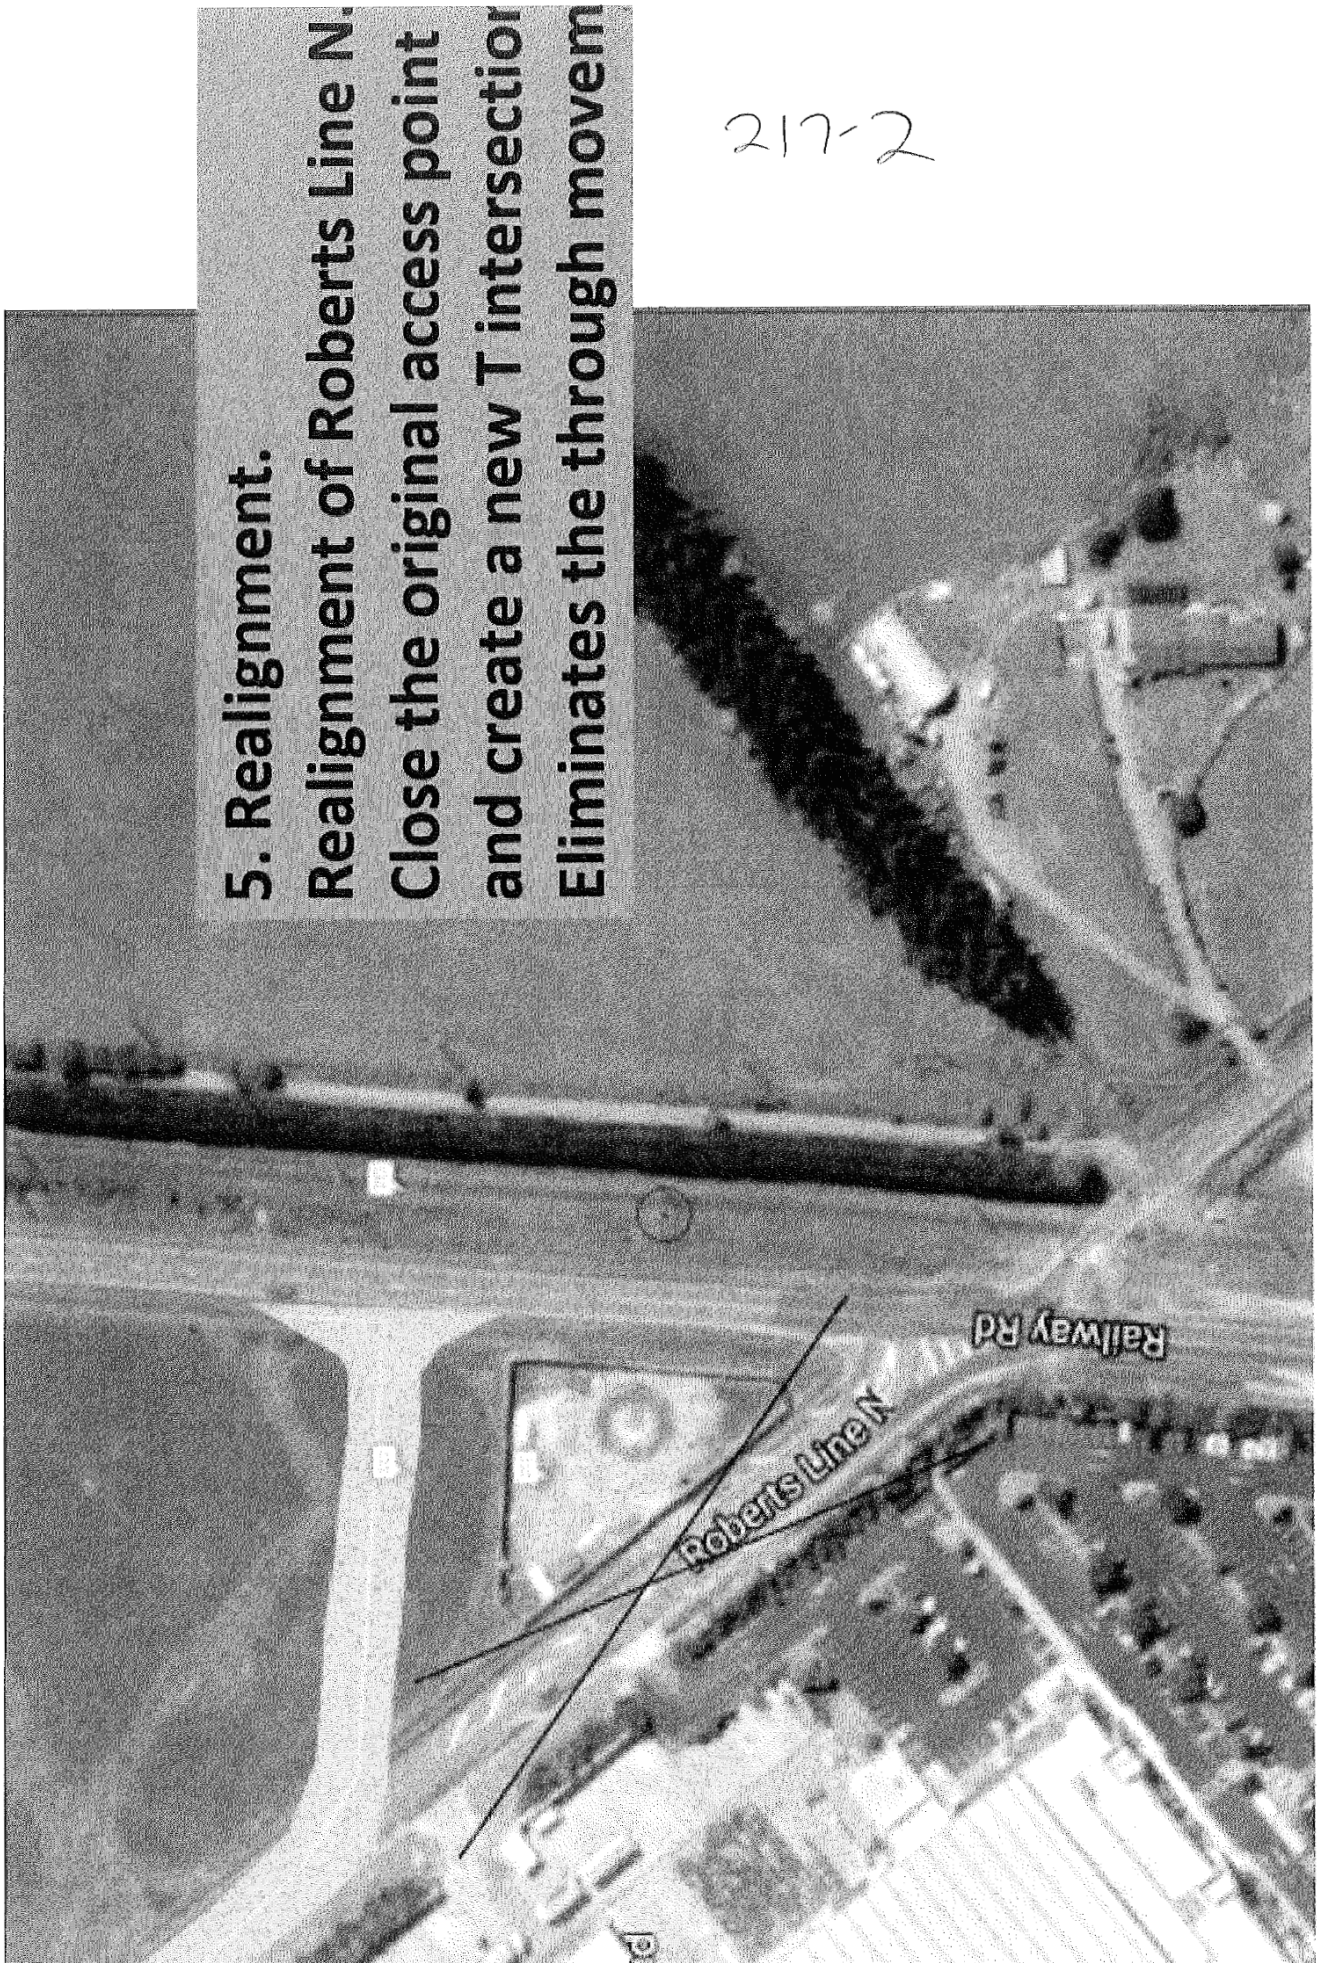

Warm regards,

Dr. Chandula Wijeweera
Midcentral DHB

Draft Palmerston North Speed Limits Bylaw 2020 Submission Form

218-2

Milson/Bunnythorpe

Road	Current Speed Limit (km/h)	Proposed Speed Limit (km/h)	Support	Oppose	Not Sure
Roberts Line North (from Kelvin Grove Road to Railway Road)	100	80	yes but should be 60		
Roberts Line North (from Railway Road to Richardsons Line)	100	80	yes but should be 60		
Railway Road	100/70/50	60	Yes		
Kairanga-Bunnythorpe Road (for 170 metres)	100	50	Yes		
Campbell Road	100	80	Yes		
Ashhurst Road (for 400 metres)	100	50	Yes		

If you have any comments to make about the proposed speed limit changes for the above roads, please write them here:

FIRST Union are submitting regarding PNCC public consultation on draft speed limits bylaw 2020:

FIRST Union agrees that the speed limit on Railway Road (from Airport Drive to Roberts Line) needs to be reduced to 60 km/h,

And also that the new speed limit extends to 200 meters north of the Roberts Line intersection.

We also propose that the speed limit on Roberts Line North (from Kelvin Grove to Railway Road) be reduced to 60 km/h not 80 km/h.

We also propose that the speed limit on Roberts Line North (from Railway Road to Richardsons Line) be reduced to 60 km/h not 80 km/h.

FIRST Union see this as a Health and Safety issue which should be taken seriously by all concerned

SUBMISSION ON DRAFT PALMERSTON NORTH SPEED LIMITS BYLAW 2020

To: Democracy and Governance Team
Palmerston North City Council
Private Bag 11034
Palmerston North 4442

Submitter: General Distributors Limited

General Distributors Limited makes this submission on the Draft Palmerston North Speed Limits Bylaw 2020 ('Bylaw'). General Distributors Limited ('GDL') is the property holding company for Woolworths New Zealand Limited which trades as Countdown in New Zealand.

GDL's submission is limited to that part of the Bylaw that concerns Milson/Bunnythorpe, and specifically the proposal to reduce the speed limit to 60km/h on Railway Road.

GDL **supports** the proposal to change the speed limit on Railway Road to 60km/h.

Reasons for submission

- GDL has recently obtained resource consent to establish the Palmerston North Ambient Regional Distribution Centre ('Distribution Centre') at Alderson Drive. Significant volumes of freight traffic will be generated by the operations of the Distribution Centre, with the majority of trucks accessing the site through the intersection of El Prado Drive and Railway Road. That will also be the primary route to and from work for the majority of staff employed at the Distribution Centre.
- A significant factor in the selection of the Distribution Centre site was its proximity to current and future strategic access routes. This accessibility is critically important given the role of the Distribution Centre in receiving goods in bulk and freighting supplies to supermarkets throughout the lower North Island.
- GDL supports the reduced speed limit on Railway Road because it will provide a safer road environment for the Distribution Centre's staff and visitors, and because it will improve the efficiency of freight movement to and from the Distribution Centre.
- The increasing extent of development in and around Railway Road, primarily in the North East Industrial Zone, means that a 100km/h 'rural' road speed limit is no longer safe or appropriate in this location. Railway Road forms part of the Palmerston North urban area and a lower speed limit is required, consistent with speed limits applied in most other urban parts of the City.

219-2

- Traffic movements through the Railway Road and El Prado Drive intersection are likely to increase significantly in the future as the North East Industrial Zone continues to develop. The existing 100km/h speed limit impedes efficient movement through the intersection, particularly for right turn movements into and out of El Prado Drive, as there is less time for vehicles to safely take advantage of gaps in passing traffic on Railway Road. That situation is exacerbated for large truck and trailer units of the type that are frequently associated with freight movements to and from the Distribution Centre. Delays in making right turn movements at this intersection will increase queueing, traffic congestion, and travel times, and may encourage risky and unsafe driver behaviour.

Decision sought

GDL seeks the following decision from Palmerston North City Council in respect of the Bylaw:

- That the part of the Bylaw that relates to Milson/Bunnythorpe be confirmed to the extent that the speed limit on Railway Road be reduced to 60 km/h.

GDL wishes to be heard in support of its submission. If other parties make a similar submission, GDL would consider presenting a joint case with them at any hearing.

Subject: Draft Speed Limits Bylaw 2020

I think most speed limits in the district are fine. The vehicles driving on these roads are getting newer, and safer, even though the speed limits have been current for a long time. The only road I feel should be reduced from 80kph, to 70kph, is heading into Feilding, over the bridge, coming into Feilding from Bunnythorpe direction.
Getting a licence should be harder, if you cant drive, stay off the road. Don't make people who can drive, drive at a reduced speed, to allow for the people who shouldn't be on the road to start with. :)

From:	Submission
Subject:	FW: Ashhurst Hill - The Terrace Speed, Limit
Attachments:	Ashhurst Hill Speed Limit.jpg; Ashhurst Hill speed. ; FW: Saddle Rd/The Terrace Speed Limits; FW: The Terrace, Ashhurst.

From: Kim Smith
Sent: Wednesday, 2 September 2020 2:07 PM
Subject: Ashhurst Hill - The Terrace Speed, Limit

Hi

Thanks for the opportunity to raise our concerns of the Speed limit from the Top of The Terrace to River Road, Ashhurst, part of the Saddle Rd.

Not long after the Manawatu Gorge was closed in 2018 the Speed limit for this section of Road (Saddle Road) was reduced to 50km (see Attached image) In March 2019 the Speed limit was raised to 60km and the addition of the Speed Threshold sign on Salisbury St. At this time I wrote to NZTA complaining of the change and the reasons why (see attached). The reply I received by NZTA was that the speed would be corrected, but this would take time because of a "Gazette process" (also attached).

Obviously it was very disappointing when I attended the PNCC drop-in Speed feedback Session at the Ashhurst Library to hear that no such process was in place.

Points we would like to raise

- Traffic not reducing speed until approaching the Speed Threshold Sign on Salisbury St. 50km needs to start at the bottom of the hill together with the Speed Threshold Sign.
- Traffic increasing speed when 60km sign in sight (heading to the Saddle from Ashhurst)
- Trucks going too fast up and down the hill, and using engine brakes as a result of the 60km Signs
- No Signage at the Bottom of the hill " Entering Ashhurst" Urban Area, Slow down.

We hope that serious consideration be made on the above to reduce traffic noise in line with the Ashhurst Traffic Migration and the assurance from NZTA the speed would be corrected.

Please contact me if you need any further information.

Regards

Kim Smith

Subject: FW: Ashhurst Hill speed.

From: Kim Smith
Sent: Wednesday, 7 August 2019 12:04 am
Subject: Ashhurst Hill speed.

Hello David, Ross.

I wish to draw your attention to the Traffic speed on Ashhurst Hill again.

I've received over the last seven months three emails from NZTA confirming the speed restriction for Ashhurst Hill would be set at **50km as it was set before the Gorge was closed**. (see attached) This also included
placing the speed radar sign at the bottom of the hill. Currently speeding traffic isn't slowing down until this sign is activated.

New high signs have now been erected at 60Km in a new position in front of our house, the previous position was fine
all that was required was to go back to original speed of 50km
Obviously this does nothing to reduce the traffic noise which I covered in my December email (See attached)

I look forward to your reply

Thanks

Kim Smith

Subject: Saddle Rd/The Terrace Speed Limits

Hi Kim,

Further to your recent email regarding the speed limits on the Saddle Road/The Terrace.

I can confirm that our earlier advice to you that the 50km/h speed limit will start down on the flat section of Saddle Road.

There is legislative process (called gazetting) around erecting speed limit signs that must be followed to make the speed limit legal.

The process is being managed by Palmerston North City Council as they are the road controlling authority for the road and not NZTA.

Once the gazetting is complete, the 60km/h adjacent to your house will change to 50km/h.

I will follow up with PNCC and let you know where they are at with the gazetting.

Regards
David

To: Kim Smith
Subject: Re: The Terrace, Ashhurst.

Hi Kim and Ann,

Thank you for your email which has raised some key concerns for our project team in the Terrace area. The mitigation measures proposed as part of the Ashhurst Traffic Mitigation project should resolve these issues.

We are proposing to move the speed threshold sign to the base of the river terrace as you've suggested. We are aware that vehicles are not slowing down until they reach the 50km sign at the top of the hill, the proposed threshold treatment should provide for slower speeds. The threshold treatment at the base of the river terrace will include kerb build outs and planting to further enforce the approach to the residential environment and encourage slower speeds.

We are planning to close The Terrace to right turning traffic coming from the Saddle Road. The Terrace will also be closed so vehicles cannot exit the Terrace. This will stop all trucks from using this route and resolve the issues you have outlined.

The above work will commence in the new year. We will do a letter drop in the new year which will provide more detailed plans and confirm the exact start date for works including any detours etc.

PALMERSTON NORTH CITY COUNCIL

PALMERSTON NORTH CITY COUNCIL

221-6

We anticipate that some of the issues you have highlighted have worsened over the last two months while we have been doing road works on Wyndham Street. It's highly likely that vehicles may have used North Street and The Terrace as an alternative route during this time. The work on Wyndham Street has been completed this week so we expect that the issues you have outlined will lessen over the next few months.

Notwithstanding this, we will progress The Terrace closure with urgency.

Kind regards,

Anna Sanson/ Communications& Stakeholder Engagement

To: Ross I'Anson; Ashhurst Traffic Mitigation
Subject: The Terrace, Ashhurst.

Hello Ross and Team

Since the upgrade to Ashhurst Hill the traffic speed has increased significantly on to Salisbury St. Truck and trailer units bouncing off the
uneven road surface at high speed (see below) This is causing high noise levels and at times causing vibration to our house.
Most traffic is not slowing down until detected by the Speed Radar Sign. We ask you to please consider moving this to the bottom of the hill
to try and reduce the traffic speed.

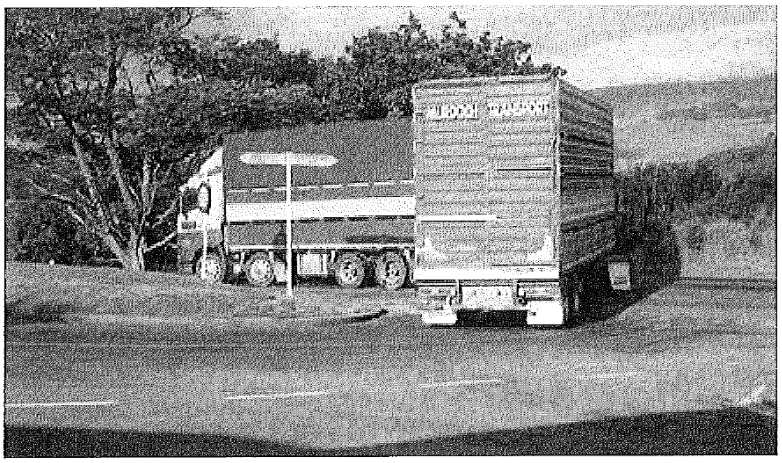

PALMERSTON NORTH CITY COUNCIL

PALMERSTON NORTH CITY COUNCIL

221-7

Traffic coming on and off the Saddle using The Terrace as a "through route" needs to be stopped (see below) Truck and trailer units are constantly using this route,
using the wrong side of the road and sometimes making three point turns to clear the junction. This is very dangerous and is also causing road surface damage as mentioned
previously. Trucks are using their horns because vehicles in front, turning right onto the Terrace, are slowing or halting their progress up the hill.
Can you please prioritise the closing of The Terrace to all traffic. (Copy of our Traffic migration feedback form attached) sent in July.

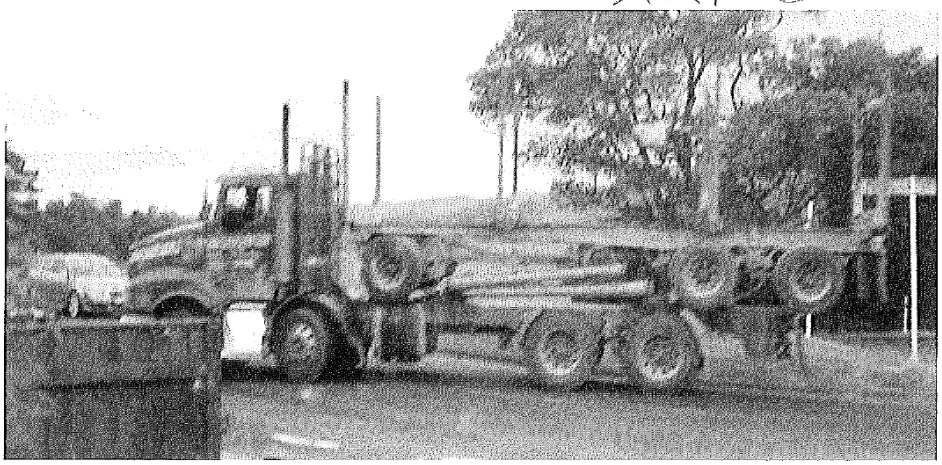

Truck turning on the wrong side of the road.

Causing car to brake well short of junction

PALMERSTON NORTH CITY COUNCIL

Palmerston North City Council
Democracy and Governance Team
Speed Limits Bylaw 2020 submissions

Email: submission@pncc.govt.nz

Dear Sir or Madam,

SUBMISSION: DRAFT SPEED LIMITS BYLAW 2020

Thank you for the opportunity to provide comment on the draft Speed Limits Bylaw 2020. This submission is made on behalf of Horizons Regional Council who hold responsibility for providing contracted public transport services and coordinating and implementing road safety initiatives across the region. This submission considers the proposed speed limits bylaw from both a road safety and public transport point of view. On the whole we **support** the draft Speed Limits Bylaw 2020 and Palmerston North City Council (PNCC) reviewing speed limits within the district.

On a general note, we encourage where possible, corridors to be considered in their entirety when addressing speed limits to reduce situations where there are fluctuations in speed due to fragmented decision making. This will ensure a consistent approach for road users across the region and limit inconsistencies within and between districts.

Specific feedback on the draft Bylaw has been split into each area where changes are proposed.

Ashhurst

The speed limit changes proposed for Ashhurst are largely supported. The reduction of speed will ensure a safer environment for motorists, pedestrians and cyclists and take into account residential growth areas within the village.

Regarding the proposed speed limit change on Hillcrest Road (100km/hr to 60km/hr), it is our submission that the speed limit should be 50km/hr. The reason being that, while the land use is rural residential, the road is narrow, winding and undulating with multiple property access points on both sides and a railway crossing at the state highway end of the road. Further, we note the current temporary speed limit for this road is 50 km/hour and has been for some time. Given these factors and the fact that Council is proposing a 50km/hr speed limit on the adjoining section of Ashhurst/Bunnythorpe Road, it is our view that it would be more appropriate to apply a 50km/hr speed limit in this area.

Tennent Drive

The changes proposed to speed limits along Tennent Drive particularly at the Fitzherbert Bridge and Summerhill interchanges are **supported**. These changes will ensure consistency

222-2

horizons REGIONAL COUNCIL

with other speed limits operating in the Summerhill area and will improve safety for motorists entering and exiting Tennent Drive. Further, the reduced speed limit will improve safety at the entry and exit points from Massey University and Food HQ.

We wish to advise that a number of Horizons contracted bus services operate along this section of Tennant Drive. While we do not expect the proposed changes to impact the ability of these services to meet the timetables, we **request** PNCC work with the Transport Team to enable monitoring and early response to any potential timetable impacts on these services.

Milson/Bunnythorpe

The changes proposed to speed limits in the Milson/Bunnythorpe area are largely **supported**. However, we make the following points and suggestions.

Railway Road (from Airport Drive to Roberts Line)

We strongly support the reduction in speed limits in this area. There are a number of risks and the safety record along this corridor is relatively poor. However, we submit that the speed limit reduction should extend beyond Roberts Line (towards Bunnythorpe) to allow transition to a lower speed for City bound traffic before the Railway Road/Roberts Line intersection (refer red line on the image below). The case for a lower speed limit in this area is clear, with increased heavy vehicle movements, competing modes of traffic (e.g. freight, commuter and cyclists) and increased land development.

We also wish to advise that the Feilding-Palmerston North bus service operates along Railway Road and through Bunnythorpe. While we do not expect the proposed changes to impact the ability of this service to meet the timetable, we **request** PNCC work with the Transport Team to enable monitoring and early response to any potential timetable impacts on this service.

Pahiatua/Aokautere

The proposed changes to speed limits in this area are **supported**, particularly along Pahiatua-Aokautere Road where the road safety record is poor.

PALMERSTON NORTH CITY COUNCIL

222-3

horizons REGIONAL COUNCIL

We do not wish to be heard in support of this submission, however welcome any feedback or questions of clarification. In this instance, please contact Rhona Hewitt, Transport Services Manager on 0508 800 800 or by email at transport@horizons.govt.nz.

Subject: Draft Speed Limits Bylaw 2020

Good morning,

I am making this submission in the hope that it will be taken into account to save lives.

We need the speed limit on Railway road dropped down to at least 70kmh, preferably 50kmh as in the past 2 years we have had a least 4 deaths in the area of railway road and Roberts Line inter-sections.
There is also regular other road traffic accidents causing injuries and delays.
With the increasing industrialisation of the area, heavy vehicle traffic is rapidly increasing.
Also now there is a greater increase in cycling to work occurring and the current speed limit makes crossing the road very dangerous at peak times.

If you have any comments to make about the proposed speed limit changes for Tennent/Summerhill Drive, please write them here:
Massey University fully supports the Stage 1 recommendations for the lowering of the maximum road speeds for vehicles on Tennent Drive from the Fitzherbert Bridge to Old West Road as an essential step towards improving the safety of road users including pedestrians, cyclists and drivers. We consider the intention to reduce the speed on the Tennent Road section closest to the bridge from 70 – 60 km/h and the interchange area limits to a uniform 60km/h to be a critical safety step. As PNCC is aware from previous concerns raised by the University regarding road safety for people entering and exiting our campus and the Science Centres these areas cause a number of accidents each year and an increasing number of near-miss accidents as Massey's student and visitor numbers continue to grow. While Massey does all it can to educate our users and visitors of the need for extreme care at all of these junctions and intersections we believe enforcing lower speed limits is a critical step in reducing the risk of serious/potentially fatal accidents. One particular point of note is that by reducing the speed for all vehicle users you will reduce the risk of motorist overtaking buses on the city-side of this road section which we are aware has resulted in accidents already this year due to other road users not having a clear line of sight passed the buses and due to speed insufficient time to make the necessary safety adjustments.

Re : Proposed change to the speed limit on the Pahiatua Track (Aokautere Pahiatua Road).

I am a long-term resident (Farmer & Research Associate) of the Upper Pahiatua Track, near to the Palmerston North and Tararua boundary. I OPPOSE the proposal to lower the speed limit on the main section of this road.

I have witnessed many of the recent accidents along this road that are mentioned. I've also responded to many of these over the years including one fatal accident and many where I've needed control traffic and clear the road for safety of users eg: from felled trees and slips. In NONE of these accidents has exceeding 100 kph been the major contributing factor.

I am very concerned that by limiting the few places this speed can be safely reached along there will be an even larger backlog of traffic (especially noisy traffic). I also believe that to propose reducing the limit is naïve, missing the point and avoiding the main issues. I also believe that the comments on the proposal on flows etc do not come from driving experience of the true characteristics of the road.

It is obvious that that there are 'many curves and bends' along this road. It's also clear that there are drivers who cannot negotiate these safely, whatever speed they are going no matter the signage present. This has been seen especially since the closing of the Gorge Road plus the frequent hold-ups with maintenance (often due to a lack foresight. I believe more effort could be put into good road maintenance, better signage, better policing of poor driving practises and illegally noisy vehicles.

I am very concerned that also by slowing the traffic there will be an even greater backlog of traffic. This is especially true since there are is more hesitant drivers and large vehicle traffic. Its very common to see vehicles slowing considerably and holding up traffic on the Track only to speed off at excessive speed on Fitzherbert East. To drop the limit would mean even slower 'lower limit' vehicles.

Issues with the road condition ae ongoing. It's interesting that Tararua have invested in good upgrades on the other end of the Track. Examples are the major hillside slip which has not been properly sorted out for 15 years and the poor tree maintenance. It's not surprising that the recent naive 'hacking' by Mercury Energy / PNCC has been curtailed by the poor knowledge and respect for this area (within 100 metres of the mentioned long-term slip!). Tree maintenance is and ongoing issue for traffic flow and safety that needs attention.

There are many other issues with the Track that I could mention but will not at the moment. To limit the speed would be unnecessary and negative to improving the flow and safety on this road, from a point of view of a long-term user and resident.

Neville Haack

Roberts Line North from Kelvin Grove Road to Railway Road

Please further reduce the speed limit from 100km to 60km.

At a recent community meeting in Bunnythorpe in August, there was strong community support to reduce the speed limit along this road to 60km instead of 80km.
It is important that this section of road is the same speed as the new 60km limit on Railway Road to avoid driver confusion. Confusion will add to the risk of another accident at the intersection, and sadly there have already been so many here, including 3 fatalities. It also needs to be the same speed as Railway Road to prevent drivers taking this route as a faster option – Roberts Line is a much narrower and more dangerous road than Railway road, and involves a railway crossing – encouraging drivers to take this route is not a good plan!

Furthermore, this section of Roberts Line:

- Has several blind dips – one cannot see traffic ahead, including cyclists, when at the bottom of a dip
- Is narrow and has both trucks and cyclists traversing it
- Contains the second entrance to Linklater reserve. This was opened in early 2020, and is becoming increasingly popular with cars often pulling off the road and parking here. When the Shearing Shed project, located at this end of the reserve, and aeroplane sculpture are completed, the entrance is likely to become even more popular
- Has tricky intersections at both ends of the segment

To avoid further accidents, please further decrease the speed limit to 60km.

One further comment regarding the speed limit changes for the Railway road – Roberts Line intersection. Please can the changes be made AFTER the intersection on the Bunnythorpe side. So that drivers are not speeding up as they come from town towards the intersection – especially as there is no turning lane into Roberts Line from Railway road, and a tricky railway crossing and uneven piece of road to navigate too!

Thank-you for making these changes to make our roads safer – it is heartbreaking to have had 3 fatalities occur near a close friend of ours house in the last 18 months. Lower speed limits would have likely prevented all three. We are appreciative of the changes being made now to prevent more tragedies in the future. The impact of this does ripple to others who care of those who live in the roads connected with **Roberts Line North from Kelvin Grove Road to Railway Road.**

Kind Regards
Lionel Ng

Subject: Draft Speed Limits Bylaws 2020 Submissions

We are requesting, please, that you consider changing current speed limit of 70 to 50 on Kingsdalepark Drive 4471.

This is a residential area, children on bikes and folks walking with and without their pets. Not to mention just everyday pulling out of their driveways.

70 is not safe or sane! Speed limit needs to be reduced to 50, ASAP!

Appreciate any and all consideration you may extend to us to keep our neighbour roads safe.

Sincerely,
Linda and Howard Craig

This speed limit should be 50km/h both on roberts line as well as railway road. It an incredibly poorly placed intersection with multifactorial hazards including the transecting railway. Railway road in particular traverses an industrial zone with heavy vehicle traffic. I say this with experience, my friends and fellow ED Doctors were killed at this intersection when a truck T boned them. The truck was naturally slowing down as he was planning to turn left in 300 meters. According to the police he was traveling at 80km/h and this was a small TIL transport truck and yet my friends died on the spot. they were both young, healthy men with no medical history (26 and 27) who could have been saved had this intersection been fixed when the first fatality occurred in 2018 December. Both had promising futures as public servants to this country. Their death is more than just two lives lost, its compounded by the opportunity cost of the lives they would have saved. This is why I propose going down to 50km/h on roberts line and railway road as a temporary measure but more importantly this intersection needs to change permanently. the best case scenario would to be make the kelvim Grove side of roberts line a dead end street thereby making this intersection a T junction. It is far too confusing to have a slanted 4 arm intersection at such a high speed area with heavy vehicle traffic. This would effectively save so many lives, and change the lives of even more. Thank you

If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:

I'm a intern at Palmerston North hospital and have lost two doctors on our roads. The next week following this accident while I was interning at the mortuary we conducted an autopsy on another victim who had died on the intersection of milson line and Kairanga bunnythorpe rd about 1km from where my friends died. She like my friends was young, no alcohol in her system or use of drugs. The majority of cases we seen in the morgue from MVA are young men and women. There is a massive loss of potential and unbearable sense of loss for those left behind. Please make our roads safer so that parents don't have to bury their children.

I spoke at a public community council meeting a few weeks ago following the death of my two friends, 2 ED doctors James Huang and Vinay Angadi. They died at the intersection of Railway Road and Robert's Line while they were on their way to a brunch in Whanganui. I believe that slowing down the speeds at the intersection will not fix how terrifying this intersection really is. I believe that slowing speeds down on both roads to a maximum of 60km/h can reduce fatalities but it still would not prevent crashes. I would like to suggest part of the Roberts Line to be made a dead end street so that it becomes a T-Intersection, and current traffic to be redirected into a safer route pending new developments of kiwirail and other facilities.

The track has got busier and busier and the speed some vehicles go particularly at the weekend is dangerous. I would support 60 or 70 kms along the track. I live on County Heights Dr and the speed limit needs to be reduced on County Heights. 60kms is still way too fast. County Heights Dr is not straight and with the curves and dips its a matter of time before a child/dog or pedestrian is killed. Either reduce the road to at least 50kms or speed bumps need to be implemented. County Heights also has no lines on the road so people not only speed but also travel either in the middle or wrong side of the road.

Hi I would like to propose a change in speed limit, in the whakarongo area: stoney creak road, from kelvin grove road to Napier road & Hendersons line should go to 80kph from 100kph, I believe this because all surrounding roads, apart from Napier road, are 80kph so why are these sections 100kph? It is such a short stretch of road and a skinny road and also has buses stopping along it and school kids walking near by. I have lived in this area my whole life and has seen way to many accidents. Thanks

I oppose this reduction of the speed limit from 100 to 80kmh on the Pahiatua - Akautere road. Your research indicates that the average speed along this road is 72kmh which shows that the speed along here is well below the current maximum of 100kmh so it seems pointless to change it to 80kmh when the current volume of traffic governs the average speed along this road already. The Tararua side of the Pahiatua track will remain at 100kmh yet it is steeper with tighter bends. As noted most of the accidents relate to curves and bends which most are under advisory speed limits which are ignored and accidents occur, this is not a road fault this is driver error. Most rural roads in New Zealand with 100kmh speed limits cannot be driven at 100kmh, without slowing down for bends so why should this stretch of road be any different? I commute this road everyday (and several times on the weekend) as I work in Palmerston North and have done so without issue since 2003. I don't think the reduced speed limit will be anymore effective than the 30kmh zone near the top of this road. If you are interested in improving this road, provide some signposted passing bays where people can pull over safely and let others past, barriers on some of the corners would improve the road as well. When the Gorge road replacement is completed then this should reduce the amount of traffic on this road and accidents.

If you have any comments to make about the proposed speed limit changes for the above roads in Pahiatua-Aokautere, please write them here:
I strongly oppose any reduction in speed on the Pahiatua Track. I have been travelling this road for the last 15 yrs without any issues or seeing any incidents. All the roads coming directly off the Pahiatua Track are winding roads and can't be driven on at 100 km/h, is there really any point in the changes. There is only one S bend from the start of the Pahiatua Track, to past Harrison Hill Road, that is not safe to travel at 100 km/h. This section of the road is over 5 km's long, so to reduce the spent limit for one bend on this section of the road seems crazy. The proposed speed change covers 9 km's of the Pahiatua Track, to reduce the speed would add to peoples travelling time and frustration. I saw someone suggest to put in no passing lines, maybe this is something that could be looked at. Quite simply its not broken and therfore does not need fixing.

Please lower the speed limit on Roberts line between railway road and Kelvin grove road. It is a very dangerous narrow road which is used by trucks, pedestrians, cyclists and cars. There is a busy entrance to the popular linklater reserve where people park and or walk to down a road with no footpath. This road is a death trap and unless the speed limit is reduced drastically another fatality will happen.

If you have any comments to make about the proposed speed limit changes for the above roads in Pahiatua-Aokautere, please write them here:
Changes proposed provide consistency to speed limits which has been lacking and reflects the growth in these areas.

General Comments
If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:
Overall the proposed speed limit changes all make sense and in many cases reflects the wishes of the community. Lowering speed limits is not the only solution and engineering up problem areas should also be part of Council's tool box to address local road speed issues. Whilst not part of the Draft Speed Limit Bylaw review itself I note the schedule of schools and the associated maps still shows the Exclusive Brethren School being located in Roberts Line. The school has relocated to Summerhill and the Roberts Line site is now a residential development.

The new speeds proposed for this area seem sensible, given that the current speeds do not match the mix of on and off ramps and Massey University turn-offs along the road. I consider that the current speed limits are too high, given the volume and mix of traffic along this stretch of road.

As a resident of Bunnythorpe, I fully support any reductions in the speed limits around the village. My criticism of this proposal is that it does not go far enough. I feel that the proposal, as it stands, is merely tweaking speed limits along troublesome roads, and does not address the more serious issues of the suitability of those roads for heavy transport. I am also concerned that there is no mention of the proposed Ring Road or the KiwiRail Freight Hub with respect to speed limit changes. I consider that consideration must be given to the overall speeds of vehicles between Milson and Kelvin Grove and Bunnythorpe, which should not exceed 70 km/h. I further contend that a wider buffer zone should be placed around Bunnythorpe set at 50 km/h - to Roberts Line North along Kairanga-Bunnythorpe Road, to Raymond Street along Ashhurst Road, to Clevely Line along Railway Road, to Newbury Line along Te Ngaio Road, and to Newbury Line along Waugh's Road. Another means of controlling speeds and traffic movement through Bunnythorpe would be to establish a heavy traffic diversion between Milson and Feilding along Roberts Line and Newbury Line. Railway Line and Kairanga-Bunnythorpe Road are currently not suitable to carry large volumes of heavy traffic.

General Comments

If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:

In a word, coherence. It is all well and good to tinker with speed limits, but I would be happier to see a more interconnected plan which - particularly in the case of Bunnythorpe - takes into account current and future vehicle movements, the conditions of roads and bridges, the location of residential areas and the practicalities of speeds, buffer zones and safety. I say this in the context of the increasing number of vehicle crashes around Bunnythorpe, and the vehicles which I notice exceeding the 50 km/h speed limit along Kairanga-Bunnythorpe Road, directly outside of my own property, as they approach the current 100 km/h zone from Bunnythorpe heading towards Kairanga, where they are immediately faced with a narrow, undulating road, narrow bridges and numerous cross-roads. Heavy vehicles should not be negotiating this stretch of road, and especially not at 100 km/h. So, reduce speed limits by all means, but please also examine the vehicles which use the variety of roads under consultation, and consider not only speed but the suitability of the roads for light, medium and heavy vehicles.

If you have any comments to make about the proposed speed limit changes for the above roads in Pahiatua-Aokautere, please write them here:
Oppose the 80 kmh speed limitf for Pahiatua/Aokautere Road .Having lived up this road for approx 12 years the accidents have all occurred on corners or bends with safe speeds signposted at70 km or less. 2 off those occurred on new seal laid from Bush Track to the corner with speed reduction signs. As PNCC has not listed any police reports from these crashes to back up there proposal, they would probably show excessive speeds as the major cause which a speed reduction would not fix. .As a highway from the east coast travel times are significantly increased at this speed especially for trucks and commuters. With the large number of cyclists on this road it would mean pulling out to pass is now more fraught with limited speed . My proposal is to install speed operated flashing warning signs above the 2hairpin bends above Harrison Hill Road, the S bend between County Heights Drive and Kingsdale park and by the large blue sign by the Bush Track. This would have a far better cost/ benefit ratio long term.

I would like to see the whole area of railway road from Richardson's line through to airport drive reduced to 60km and on Roberts line to Railway Road. As the parent of a driver nearly killed in the fatality on Roberts line 18 months ago and a work colleague of the two Emergency Department doctors who were killed there last month.It has been a road of too many accidents and now fatalities. The build up over the last 5-10 years of industrial buildings and Heavy trucks is now at capacity for a road with difficult access onto from El Prado and Roberts line.To mitigate this, the road speed should be lowered at Richardson's to allow traffic to get better visual queues prior to entering the melee that is the industrial zone. Having multiple different speeds makes it confusing for drivers and increases the visual pollution that drivers need to contend with while travelling at speed, this reduction would make drivers start to change their speed, thus read the road and conditions better.

I strongly oppose the proposed speed limit reductions in the Tennent Drive area. These are important commuter links; the roads are well-engineered for current speeds; speed zones are clear and obvious as-is. Speeds are self-limiting in heavy-use periods. Having used these roads regularly over 20 years I consider that current speeds are perfectly appropriate for safe travel.

If you have any comments to make about the proposed speed limit changes for the above roads in Pahiatua-Aokautere, please write them here:
I Strongly Oppose the proposed speed reductions to Pahiatua-Aokautere Road and consequently the associated side Roads. The fact that the freeflow average speed is only 72 km/h.shows that there is no need whatsoever for a speed limit reduction, it is already self limiting. Reducing the speed limit will only serve to reduce commuter efficiency; increase driver frustration, remove already limited opportunity for passing. The poor state of the road, inconsiderate and poor driving are far bigger risk factors. Corners currently have a posed recommended speed as low as 25Km/h; yet crashes have occurred on them; dropping the max speed to 80Km/h will do nothing to improve the safety of many sections. Having regularly traveled these roads and lived in the area for over 10 years I consider these restrictions will do nothing to improve road safety and will in fact cause further problems including increased complacency of drivers; increased frustration; increased exposure to reckless drivers simply due to increased time on the road; increased business costs due to travel time, and further excuses for lack of proper investment in road safety. Clearly 100Km/h is too fast for some side roads, but while it is a maximum, it is not a target and the vast majority of users travel at safe an appropriate speeds far less than 100Km/h. Setting a new limit will do nothing to improve safety.

248-S

General Comments
If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:
Other than addressing areas of urban spread, proposed speed limits like Pahiatua-Aokautere Road and Tennent drive will do nothing to improve safety and I would argue may have worse safety outcomes. Road users and residents deserve better than having the council meddle with speed changes rather than address underlying problems such as the condition of Pahiatua-Aokautere Road. The evidence is that speeds are already self-limiting in these areas. Speed limit changes only inconvenience efficient use of these roads more open areas and outside of peak times. I implore council to consider the full practical reality of these changes, not the superficial and shortsighted notion that a reduction of maximum speed limit helps anything in many of these areas. Transport efficiency is critical to our region and these proposals are only a hindrance.

If you have any comments to make about the proposed speed limit changes for the above roads in Pahiatua-Aokautere, please write them here:
The poor road conditions are the issue here and need to resolved. Reducing speed limits will only increase driver complacency and driver frustration. Drivers currently already drive to the conditions which often dictate speeds well less than the current limit. Reducing speed limits is simply unnecessary and will only be a cause of further issues.

If you have any comments to make about the proposed speed limit changes for the above roads in Pahiatua-Aokautere, please write them here:
Increased through traffic both ways on Polson Hill Drive and The Bush Track to The Pahiatua Track far exceeds the current speed limit. This increase in through traffic is due to GPS systems recommending Polson Hill Drive and the Bush Track as a short cut instead of normal route via Aokautere Drive to the Pahiatua Track intersection.

Oppose
If you have any comments to make about the proposed speed limit changes for Tennent/Summerhill Drive, please write them here:
The reason I oppose is that Tennent Drive is a good wide road with good visibility and is no different to the rest of SH57 back towards Linton and Tokomaru. The NZTA's assessment of 60km/h certainly does not fit the environment, especially considering developments in modern cars.

If you have any comments to make about the proposed speed limit changes for the above roads in Pahiatua-Aokautere, please write them here:
With respect to the Pahiatua - Aokautere Road. It is great to see some common sense being applied and going against the NZTA assessment tool recommendation. 80 km/h does seem an appropriate speed for this section of road. As a contrast the current limit of 60 km/h across the Saddle road is absolutely ridiculous.

General Comments
If you have any general comments to make about the draft Speed Limits Bylaw 2020, please write them here:
It is great to see that common sense has been applied to a lot of the decisions. Thank You for the opportunity to submit.

If you have any comments to make about the proposed speed limit changes for the above roads in Ashhurst, please write them here:
Hillcrest Rd should be 50km/h to be consistent with the change om Mulgrave St as it's just confusing to have multiple speeds in the same basic area. Colyton Rd should be 50km/h all the way to at least the intersection with Grove Rd to: 1. Encourage vehicles entering Ashhurst to slow before the hill. 2. Provide more safety for pedestrians and cyclists on the hill as it's such a narrow road with no paths.

PROCEDURE SHEET

HEARING OF SUBMISSIONS

Presenting your submission

You have indicated a wish to present your submission in person before a committee of Councillors. You may speak to your submission yourself or, if you wish, arrange for some other person or persons to speak on your behalf.

We recommend that you speak to the main points of your submission and then answer any questions. It is not necessary to read your submission as Committee members have a copy and will have already read it.

Questions are for clarifying matters raised in submissions. Questions may only be asked by Committee members, unless the Chairperson gives permission.

Time Allocation

10 minutes (including question time) will be allocated for the hearing of each submission. If more than one person speaks to a submission, the time that is allocated to that submission will be shared between the speakers.

Who will be there?

The Planning and Strategy Committee will hear the submissions. The Committee comprises of elected members as identified on the frontispiece of the Agenda.

There will also be other people there who are presenting their submission. The Hearing is open to the media and the public.

Agenda

An Agenda for the meeting at which you will be speaking will be forwarded to you once available. The Agenda lists the submissions in the order they will be considered by the Committee, although there may be some variation to this.

Venue

The meeting will be held in the Council Chamber, First Floor, Civic Administration Building, 32 The Square, Palmerston North.

The Council Chamber will be set out with tables arranged appropriately. You will be invited to sit at the table with the Councillors when called.

Tikanga Maori

You may speak to your submission in Maori if you wish. If you intend to do so, please contact us no later than four days before the date of the meeting (refer to the "Further Information" section below). This is to enable arrangements to be made for a certified interpreter to attend the meeting. You may bring your own interpreter if you wish.

Visual Aids	A whiteboard, and computer with PowerPoint will be available for your use.
Final Consideration of Submissions	Final consideration of submissions will be at the ordinary meeting of the Planning and Strategy Committee on Wednesday 11 November 2020. The media and public can attend these meetings, but it will not be possible for you to speak further to your submission, or participate in the Committee or Council deliberations.
Changes to this Procedure	The Committee may, in its sole discretion, vary the procedure set out above if circumstances indicate that some other procedure would be more appropriate.
Further Information	If you have any questions about the procedure outlined above please contact Susana Figlioli, Democracy & Governance Administrator, phone 06 356-8199 or email susana.figlioli@pncc.govt.nz.
